

# Is rcm3.org legit? TrustSniffer's high-trust assessment: 100/100

rcm3.org

## Verdict

100

OUT OF 100

HIGH TRUST

rcm3.org appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 40%.

What this site appears to be

Marketing and product page for RCM3, a Reliability Centred Maintenance (RCM) software from Renovetec offering cloud-hosted application, hosting, data preloading, training and mobile apps. Contact details and demo/consultation CTA present.

## Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
  - Module-level completeness metadata is unavailable for this legacy report.

What rcm3.org served when TrustSniffer captured it on 2026-08-21. The page may look different now.

## Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

### Overview

RCM3 is a corporate SaaS and professional-services website presenting Reliability Centred Maintenance software for industrial maintenance teams, with cloud hosting, implementation, data preparation, training, mobile applications, demonstrations, and consultation services offered as part of the business model.

### Scam/Impersonation Risk

No phishing, impersonation, blacklist, or other contradictory signals were observed. The homepage presents a coherent commercial software offering rather than a high-risk conversion flow: RCM3 is described as maintenance-management software, with implementation, hosting, preloaded asset data, training, reporting, backups, and mobile access. The site's apparent legitimacy is also consistent with a long-established domain and sustained historical presence, although the real-world operator identity remains independently unverified. Evidence:

- The homepage identifies RCM3 as Reliability Centred Maintenance software and describes implementation, hosting, preloaded data, training, reporting, backups, and mobile applications.
- The domain was registered on 2016-02-13 and is approximately 10.53 years old.

- Historical coverage records 92 archive snapshots spanning 2016–2026, across 11 tracked years.

### Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate software provider, but it does not independently prove that Renovetec is the legal entity operating the site. The homepage supplies a Spanish business address, telephone number, and a Renovetec contact identity, while the visible business model is commercial SaaS and consulting rather than a service inherently presented as regulated financial activity. No licence, registration number, or regulatory authorisation is claimed in the supplied content; this is a disclosure and verification gap, not evidence of a scam. A separate broker-reputation dataset produced no matching result, which is a neutral-to-positive contextual signal rather than a legal or licensing determination. Evidence:

- The homepage Contact section lists Calle Gerona Nº2, 28945 Fuenlabrada, Madrid, Spain, together with a telephone contact and a Renovetec-branded contact channel.
- The homepage describes software licensing, hosting, implementation, training, and consultation services, with demo and consultation calls to action.
- The site is hosted on AS198066, LOADING - Grupo Loading Systems, S.L., ES.
- The transport certificate is issued by YR2, uses DV validation, and is valid to 2026-09-27.

### What to Verify Next

Before entering into a commercial contract or supplying business data, the prospective customer should independently confirm the contracting entity and its authority to provide the stated software and professional services, review the applicable service, privacy, data-processing, support, and termination terms, and confirm payment-protection arrangements appropriate to the transaction. Contact details should be validated through an independently sourced business channel rather than relying solely on the website.

#### EVIDENCE

- The homepage provides a named product, service catalogue, business address, telephone contact, and demo/consultation pathway suitable for independent commercial verification.
- The supplied page content does not include a licence or registration number for validation against an external registry.
- The site presents cloud hosting and preloaded customer asset data, making contractual data-handling and service-continuity terms relevant to procurement review.

### Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence strongly consistent with an established, apparently legitimate SaaS website and no observed scam or impersonation contradictions. The principal residual uncertainty concerns independent attribution of the operating entity, so the classification supports normal business consideration without treating operator identity as proven.

### Infrastructure Integrity

The hosting and transport arrangements provide a stable, identifiable technical foundation and are consistent with ordinary commercial web delivery. This infrastructure is a mitigating operational signal only; it does not independently establish the identity or legal status of the operator.

## Closing Assessment

Proceed with ordinary enterprise procurement and security checks, with independent confirmation of the contracting party and appropriate contractual, data-protection, and payment safeguards before credential or payment interactions.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

## What the analysis found

No rule findings contributed to this verdict.

## Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of rcm3.org.

- The request stayed on rcm3.org. It was not redirected to another domain. CLEAR
- Registration is published under Grupo Loading Systems S.L.. CLEAR
- DNS for this domain is served by grupoloading.com, across 3 name servers. NOTED
- The registration is paid up to 2027-02-13. NOTED
- The earliest public archive of this site is from 2016-08-07. CLEAR
- It is hosted on LOADING, from a server in ES. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about rcm3.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
