Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2013.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Русская Дымка is an established Russian ecommerce website offering equipment, ingredients, accessories, courses, recipes, and related supplies for home distilling, brewing, smoking, food preservation, and cheesemaking. Its apparent business model is conventional online retail supported by physical stores, delivery, customer support, loyalty services, and educational content.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent retail operation with product categories, prices, discounts, store locations, delivery and returns information, telephone support, customer login, and legal policies. Its stated products and services—such as distillation equipment, brewing ingredients, smoking supplies, cheesemaking products, courses, and gift certificates—align with an ordinary ecommerce model, with no phishing, impersonation, deceptive financial, or cryptocurrency indicators identified. Normal interaction, including account login and standard purchases, is appropriate.

- The homepage contains a substantial product catalogue, pricing, promotions, store information, delivery, returns, and customer-support details.
- The site's published business model covers retail products, courses, recipes, subscriptions, and loyalty benefits rather than financial services.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing finding.
- The domain was registered in 2013 and is 13.311430527036277 years old; archival coverage contains 196 snapshots spanning 2013–2026, with 14 years tracked.

Regulatory Verification Notes

The site provides legal policies, delivery and payment information, warranty and returns material, store addresses, and customer-service channels. No specific financial, investment, or regulated-service licensing claim is relevant to the presented retail model; any applicable commercial-registration or sector-specific requirements should nevertheless be confirmed through the appropriate Russian registry if required for onboarding. A third-party broker dataset found no match, which is contextual reputational support rather than a licensing determination.

- The homepage and associated policy content identify retail categories, physical stores, customer support, delivery, payment, warranty, and returns.
- The site is served through AS57724, DDOS-GUARD - DDOS-GUARD LTD, RU.

- TLS uses issuer YR2 with DV validation and is valid through 2026-10-21.
- The domain appears within the top one million of the recorded global traffic ranking.

What to Verify Next

For procurement or higher-value commercial engagement, confirm the seller’s legal entity and any applicable commercial requirements through an independent registry, and validate payment, delivery, warranty, and returns terms against the intended transaction. Customer-service and store details should be confirmed through an independently obtained channel before resolving material disputes.

- The homepage publishes store locations and telephone support operating from 08:00 to 20:00.
- The site exposes login, callback, and email-subscription forms without directing sensitive forms to an untrusted destination.
- The website links to established social platforms including YouTube, Telegram, VK, OK.ru, and TikTok.

Summary Verdict

The website presents as a legitimate, established, and trustworthy ecommerce business with a coherent operating model and no observed scam or impersonation indicators. Its identity, content, historical presence, technical operation, and external reputation converge on a high-confidence legitimate assessment.

Infrastructure Integrity

The site has no detected CDN or WAF edge layer and resolves to its hosting environment through DDOS-GUARD infrastructure. This provides some network-level mitigation, but it is treated as a protective operational characteristic rather than proof of legitimacy.

Closing Assessment

Normal browsing, account login, and standard purchasing activity are appropriate, subject to ordinary commercial checks for material transactions.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of rdshop.ru.

- The request stayed on rdshop.ru. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2013-04-09. CLEAR
- It is hosted on DDOS-GUARD, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rdshop.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
