

Is rebuy.de legit? TrustSniffer's high-trust assessment: 100/100

rebuy.de

Verdict

100

OUT OF 100

HIGH TRUST

rebuy.de appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-04 by automated analysis. Classification confidence 45%.

What this site appears to be

German recommerce storefront for buying and selling used electronics and media. It promotes professionally checked goods, a three-year warranty, savings compared with new products, a 21-day withdrawal right, free insured trade-in shipping, and a documented inspection and payout process.

Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is a German recommerce storefront that buys used electronics and media from consumers, inspects or refurbishes the items, and resells them through a broad online catalogue covering smartphones, computers, cameras, consoles, audio equipment, books, films, music, and video games.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, malicious reputation findings, or suspicious transaction mechanics were observed. The storefront presents a coherent commercial model, while the tested interactions showed no credential redirection, concealed forms, clipboard interference, wallet activity, or unexplained external communications. These mutually reinforcing content, behavioural, and reputation signals support the conclusion that the site is legitimate rather than an imitation or deceptive storefront.

- The homepage displayed a substantial, internally consistent retail catalogue and a documented consumer trade-in process.
- Homepage analysis found no hidden forms, external password forms, suspicious inline scripts, cloaking, wallet-provider activity, or clipboard manipulation across two successful test runs.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no phishing finding, no reported abuse, and a global traffic rank of 48,456.
- The homepage contained no detected brand-impersonation indicators or content-level fraud flags.

Regulatory Verification Notes

The observed service is conventional retail recommerce rather than a financial or investment product, and no regulated-service claim requiring financial licensing was identified. The homepage provides meaningful consumer-facing commitments, including a three-year warranty, a 21-day withdrawal period, free insured trade-in shipping, device inspection, data deletion, and a documented payout process. The supplied evidence does not include separate legal or corporate-identity pages, so no broader assessment of their disclosures is made.

- The homepage states that goods are professionally inspected or refurbished and advertises a three-year warranty.
- The homepage describes a 21-day withdrawal right and free insured shipping for consumer trade-ins.
- The site's hosting infrastructure is served from AS16509 (Amazon.com, Inc., US).
- The site's transport encryption uses a DV certificate issued by Amazon RSA 2048 M01, valid to 2026-11-04.

What to Verify Next

For higher-value purchases or trade-ins, the current warranty, withdrawal, grading, payment, payout, and data-deletion terms should be retained with the transaction record. Product condition, included accessories, return eligibility, and the applicable reimbursement method should be confirmed at checkout, as these operational details can vary by item and transaction.

- The homepage distinguishes purchasing from consumer selling, making transaction-specific terms relevant to each workflow.
- The homepage represents that submitted devices undergo inspection before payout, so the applicable grading and valuation conditions should be reviewed before dispatch.
- The advertised catalogue includes used devices with potentially variable condition and accessory configurations, supporting item-level confirmation at checkout.

Summary Verdict

The website has a high-trust, established commercial posture supported by convergent identity, content, behavioural, traffic, and external-reputation evidence. No contradictory risk signals were identified. Normal interaction, including account login and standard purchasing or selling activity, is appropriate.

Infrastructure Integrity

The site operates on mainstream Amazon infrastructure with valid transport encryption. This provides a sound baseline for availability and secure transmission, although infrastructure protections are supporting controls rather than independent proof of commercial legitimacy.

Closing Assessment

Prospective customers may use the site normally, applying routine e-commerce diligence by retaining order records and reviewing transaction-specific terms before completion.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of rebuy.de.

- The request stayed on rebuy.de. It was not redirected to another domain. [CLEAR](#)

- DNS for this domain is served by awsdns-35.org, across 4 name servers. NOTED
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rebuy.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
