Full analysis

Overview

The website is a Spanish-language local real-estate agency site operating under the Recalde Propiedades name, presenting properties for sale, temporary rental, investment, construction projects, and related real-estate services across communities in Argentina's La Costa region.

Scam/Impersonation Risk

The site's visible content is consistent with a conventional property-listing business and does not show an obvious login form, credential-harvesting mechanism, or brand-impersonation pattern. However, this benign page presentation is materially outweighed by confirmed external threat detections and a blacklist hit, creating a significant contradiction between the site's apparent business purpose and its external reputation. The site's apparent longevity and historical continuity do not resolve that contradiction; the operator's real-world identity also remains unverified. Sensitive interaction should therefore be treated as unsafe pending independent confirmation.

EVIDENCE

- The homepage presents property sales, temporary rentals, permutas, construction projects, prices, and localities served, with no sensitive form detected.
- Behavioral testing recorded no login form, hidden form, wallet interaction, password submission, clipboard hijacking, or cloaking, but recorded a maximum post-interaction DOM difference of 9,472.
- The domain is recorded as registered in 2007 and approximately 19.02 years old.
- Historical records show 100 archive snapshots spanning 2007–2026, covering 20 tracked years.

Regulatory Verification Notes

The site presents a family-business description and the name “Recalde Sujoparoff,” but the available evidence does not independently verify the legal operator. No licence, registration number, or licensing authority is identified in the supplied business-model evidence. For a real-estate service, this is a material disclosure gap requiring registry-level confirmation rather than an assumption that the on-page description establishes legal standing. A separate broker-reputation dataset produced no matching result, which is only neutral contextual information and not a licensing determination.

EVIDENCE

- The “Quienes Somos” content describes the business as a family company with more than 20 years of presence in La Costa.
- The homepage and contact content identify the agency and provide an office address and contact details, but the supplied evidence does not independently connect those details to a verified legal entity.
- The site is hosted on AS19318, Interserver, Inc., United States.
- Its TLS certificate is issued by YR2, uses Domain Validation (DV), and is valid until 2026-10-07T18:34:37+00:00.

What to Verify Next

Before any credential submission, deposit, reservation, or payment, independently confirm the agency’s registration and any applicable real-estate authorisation with the relevant Argentine provincial or local registry. Confirm the office, agent identity, property ownership or mandate, and transaction documentation through an independently obtained telephone number or an in-person channel rather than relying solely on details supplied by the website. Payment instructions and beneficiary details should be checked against signed contractual documentation before funds are transferred.

EVIDENCE

- The “Quienes Somos” page supplies the business description that should be matched to an official registry record.
- The “Contacto” page supplies the office and contact information suitable for independent cross-checking.
- Property pages contain listing addresses and asking prices that should be reconciled with ownership or agency-authorisation documents.
- The site's transport encryption is DV-only, which protects transmission but does not authenticate the business operator.

Summary Verdict

The overall posture is **low trust with elevated risk for sensitive interaction**. The site appears substantively consistent with a real-estate listing operation, but the combination of unresolved identity verification and confirmed external reputation contradictions prevents a legitimate or trustworthy conclusion.

Infrastructure Integrity

The site resolves directly to a single hosting address on Interserver infrastructure, with no detected CDN or WAF and no separate edge-IP layer. This provides a straightforward technical path to the host but offers no meaningful protective infrastructure mitigation against the external reputation concerns.

Closing Assessment

Sensitive use should be deferred until the operator, transaction documents, and payment destination have been independently validated through authoritative and offline channels.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about recaldepropiedades.com.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
