

Is recargapay.com.br legit? TrustSniffer's high-trust assessment: 90/100

recargapay.com.br

Verdict

90

OUT OF 100

HIGH TRUST

recargapay.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 75%.

What this site appears to be

Landing page for RecargaPay, a Brazilian payment institution offering accounts, cards, Pix on credit, cashback, loans, and CDI-linked yield. Contains regulatory CNPJ and address, customer support contacts, and app download prompts.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

RecargaPay is a Brazilian fintech and payments website presenting account services, credit cards, Pix payments, mobile and transport recharges, cashback, loans, business tools, and CDI-linked balance yields, with the apparent purpose of providing consumer and business payment and financial services through its application.

Scam/Impersonation Risk

No contradictions were observed. Available external reputation checks recorded no malicious or suspicious detections, no phishing or brand-impersonation indicators were identified, and no matching broker-reputation record was present. Homepage interaction telemetry did register dynamic content changes and externally connected activity, but the same observations showed no hidden forms, externally submitted password forms, wallet-draining behavior, clipboard manipulation, or cloaking; these are therefore treated as implementation characteristics rather than evidence of impersonation. The site is consistent with an established, apparently legitimate service, although the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage is identified as a corporate fintech landing page for RecargaPay and contains no reported phishing, impersonation, or other content red flags.
- External reputation checks recorded 0 malicious detections and 0 suspicious detections, with no external blacklist or browser-safe-browsing hit.
- Homepage behavior showed no hidden forms, password submissions to untrusted destinations, wallet-connect activity, wallet-drainer activity, or cloaking.

Regulatory Verification Notes

The homepage presents a Brazilian payment-institution model with accounts, Mastercard credit-card products, Pix using a credit card, cashback, personal and CLT-consigned loans, business accounts, payment links, Tap to Pay, and CDI-linked balance returns. It advertises specific financial outcomes, including 1.5% cashback and automatic returns of 120% of CDI, as well as Pix payment in up to 18 installments; these claims make product terms, eligibility, fees, yield conditions, and repayment obligations material to any engagement. The page provides a CNPJ and address, while the supplied content does not identify a specific licensing authority or license number. Registration records name RECARGAPAY DO BRASIL SERVICOS DE INFORMATICA LTDA, but that record is supporting identity context rather than independent proof that the website operator or every

financial product is authorized. The domain's long registration continuity, strong archival record, clean reputation, established page content, and valid transport encryption provide converging evidence of an established site.

EVIDENCE

- The registration record shows the domain was registered on 2015-06-02 and is approximately 11.2 years old.
- Web archives contain 5,000 snapshots from 2015-09-23 through 2023-05-21, spanning 9 tracked years.
- The domain is served on AS16509 by AMAZON-02 - Amazon.com, Inc., US.
- TLS uses the Amazon RSA 2048 M01 issuer with DV validation and is valid through 2026-12-16.

What to Verify Next

Before credential or payment interactions, an independent check should match the legal details shown on the homepage against the relevant Brazilian corporate and financial-service registries and confirm which entity is responsible for each service. Product terms should be reviewed for fees, eligibility, yield conditions, credit costs, installment obligations, cancellation rights, and dispute or reimbursement procedures. Official support and application channels should also be cross-checked through independently sourced contact information rather than relying solely on a page reached through an unsolicited message or advertisement.

EVIDENCE

- The homepage supplies legal and address information that can be used for an independent registry comparison.
- The homepage promotes account opening, financial products, customer support, and application downloads, creating identifiable channels for independent validation.
- The supplied page content does not state a specific licensing authority or license number, making regulatory-scope confirmation an appropriate pre-engagement check.

Summary Verdict

The available evidence supports a high-trust posture and is consistent with an established, apparently legitimate website rather than a scam or impersonation site. The classification is strong, but the operator's real-world identity is not independently verified, so legitimacy should be described as evidence-consistent rather than proven.

Infrastructure Integrity

The site is protected by Amazon CloudFront CDN/WAF infrastructure, with observed traffic terminating on Amazon edge addresses rather than a directly exposed origin. This provides a meaningful mitigation against routine infrastructure exposure and abuse, but remains a security-control signal rather than proof of business legitimacy.

Closing Assessment

Ordinary independent merchant-identity, return-policy, and payment-protection checks should be completed before credentials or payment details are submitted.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of recargapay.com.br.

- The request stayed on recargapay.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-50.org, across 4 name servers. NOTED
- The registration is paid up to 2028-06-02. CLEAR
- The earliest public archive of this site is from 2015-09-23. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about recargapay.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
