Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is Recreio, a Portuguese-language entertainment and general-interest news publication associated on the page with Grupo Perfil. It presents articles covering television, music, films, idols, education, nature, games, and cultural topics, with an apparent advertising-supported media model involving display advertising, sponsorships, and media partnerships.

Scam/Impersonation Risk

No contradictions were observed. The available evidence does not indicate phishing, brand impersonation, malicious distribution, or a confirmed blacklist event, and external reputation checks were clean. The behavioral review did identify repeated hidden-form activity, substantial DOM changes after interaction, and some non-whitelisted network requests; however, no password-bearing external forms, wallet-drainer behavior, clipboard hijacking, or cloaking were detected. In the context of a dynamic editorial site, these observations are treated as limited behavioral anomalies rather than evidence of an impersonation or scam operation.

EVIDENCE

- The homepage is classified as a news, blog, media, and entertainment page, with no phishing indicators or suspected brand impersonation.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist match and zero abuse reports.
- Domain registration evidence records 17 December 2010 and an age of 15.66 years.
- The homepage behavior review recorded hidden forms in both observed runs, while recording zero external password forms, zero wallet-connection runs, and zero clipboard-write events.

Regulatory Verification Notes

The site presents an editorial media business rather than a financial, investment, or other evidently regulated service. No regulated-service license claim or license number is presented in the available content, so regulatory licensing is not a central legitimacy issue for the stated business model; nevertheless, the available evidence does not independently verify the real-world operator identity. The page's attribution to Grupo Perfil is consistent with an established publication, while the absence of independent identity verification warrants a routine corporate-identity check if the relationship becomes commercially significant. No adverse broker-reputation match was identified, although that context is not a legal or licensing determination.

EVIDENCE

- The homepage identifies the publication as Recreio and associates it with Grupo Perfil through its editorial and footer context.
- The stated business model is advertising-supported publishing involving editorial content, display advertising, sponsorships, and media partnerships.
- The site is served through AS13335, Cloudflare, Inc.; its TLS certificate is issued by WE1 at DV validation level and is valid to 2026-10-07.
- The page capture returned HTTP 200 and contained substantive editorial text across entertainment, education, nature, games, and current-news categories.

What to Verify Next

Before any credential or payment interaction, an organization should independently confirm the Grupo Perfil relationship through a separately sourced corporate channel, review the site's privacy, advertising, and partnership disclosures, and confirm that any payment flow uses expected merchant details and available payment protection. If a regulated product or service is later offered under the site's branding, the relevant license should be checked directly with the applicable authority rather than inferred from the publication's reputation.

EVIDENCE

- The footer contains contact and partner information that can be compared with independently sourced corporate details.
- The homepage presents editorial publishing and advertising activity rather than a stated financial or investment service.
- The available capture contains no login form or sensitive submission form, so any later credential or payment workflow should be treated as a separate interaction requiring its own validation.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website. The classification supports ordinary browsing and routine use, while the real-world operator identity remains independently unverified.

Infrastructure Integrity

Cloudflare provides the site's CDN and WAF protection, with observed traffic served from Cloudflare edge infrastructure rather than a directly exposed origin. This is a mitigating security characteristic that helps reduce direct origin exposure, but it is not, by itself, proof of legitimacy.

Closing Assessment

Normal editorial use is proportionate to the current assessment; credential or payment interactions should follow the ordinary independent identity, policy, and payment-protection checks appropriate to the specific transaction.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of recreio.com.br.

- The request stayed on recreio.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-12-17. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about recreio.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a

legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
