Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

RedCart is a Polish-language ecommerce SaaS platform that presents online-store creation, multichannel sales, automation, integrations, analytics, customer support, and free account registration for businesses seeking to manage online commerce from one platform.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent subscription-based software model, with identifiable functions such as store creation, AI-assisted selling, competitor monitoring, product analysis, order automation, and multichannel management. Its claims, including joining more than 100,000 sellers and a customer testimonial describing nearly doubled revenue after migration, are commercial claims rather than indicators of impersonation or phishing. Independent reputation checks found no malicious or suspicious detections, and the site showed no login form, hidden form, wallet activity, or brand-impersonation indicators.

EVIDENCE

- The homepage identifies RedCart as an ecommerce platform and provides product navigation, pricing, support, and free-account calls to action.
- The homepage contains no detected phishing, impersonation, malware, or high-risk financial indicators.
- External reputation checks recorded zero malicious and zero suspicious detections.

Regulatory Verification Notes

The site appears to operate as a commercial software provider rather than a financial or investment service. The reviewed landing page does not state a licensing authority or registration number; this is a transparency point for ordinary corporate and contractual verification, not evidence of fraud. The long-established domain, recognized registrar, valid transport encryption, and established traffic footprint support the conclusion that the service has a durable operating presence.

EVIDENCE

- The domain was registered on 2008-09-22 and is approximately 17.87 years old; registrar: OVH SAS.
- The site is served from AS47544, IQPL-AS – IQ PL Sp. z o.o., Poland.
- TLS uses RapidSSL TLS RSA CA G1 with DV validation and is valid through 2026-09-24.
- The domain is within the global top one million traffic sites, at rank 127067.

What to Verify Next

Before entering into a significant commercial subscription or data-processing arrangement, the prospective customer should confirm the contracting entity, applicable terms, and any required business registration or sector-specific obligations through independent corporate and regulatory records. Official support and contact channels should also be confirmed through an independently obtained business source.

EVIDENCE

- The homepage links to pricing, support, account creation, and customer-facing product information.
- The page describes subscription software, integrations, automation, and partner services rather than regulated financial products.
- The site's legal and commercial documentation should be checked alongside the proposed contract before material onboarding.

Summary Verdict

RedCart is a legitimate, established, and high-trust website with a coherent SaaS business model, clean external reputation, and no observed scam or impersonation contradictions. Normal interaction, including account login and standard platform use, is appropriate.

Infrastructure Integrity

The site resolves directly to two likely origin addresses without a detected CDN or edge-IP layer. Its hosting is provided by IQPL-AS – IQ PL Sp. z o.o. in Poland, and the valid RapidSSL certificate provides standard transport protection; these infrastructure characteristics are consistent with a functioning commercial service but are mitigating technical signals rather than proof of legitimacy.

Closing Assessment

Proceed with normal business onboarding, subject to the prospective customer's standard contractual, corporate, and data-processing due diligence.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	50%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of redcart.pl.

- The request stayed on redcart.pl. It was not redirected to another domain. CLEAR
- Registration is published under OVH SAS. CLEAR
- DNS for this domain is served by anycast.me, across 2 name servers. NOTED
- The registration is paid up to 2026-09-22. NOTED
- It is hosted on IQPL-AS, from a server in PL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about redcart.pl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
