Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2022.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Refraime is a corporate B2B website presenting AI-powered intrusion detection and smart surveillance solutions that integrate with existing cameras, with an apparent business model centred on real-time monitoring, alerts, remote access, local support, and demo or callback requests for commercial, industrial, residential, and wildlife-security applications.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent security-technology service model rather than financial manipulation, credential harvesting, or impersonation. It contains no login form, sensitive submission workflow, crypto functionality, or deceptive payment mechanism; its sole form is a contact form supporting commercial enquiries. External checks found no malicious or suspicious detections, and the site has a measurable public traffic footprint.

- Homepage content describes AI intrusion detection, event detection, camera integration, monitoring, alerts, and demo requests.
- Homepage analysis identified no phishing indicators, hidden forms, password collection, wallet activity, or brand-impersonation signals.
- Domain registration: 2022-05-30 (~4.18 years old).
- The site has 17 archive snapshots spanning 2022–2026 (5 years tracked).

Regulatory Verification Notes

Refraime appears to operate as a commercial technology provider, not as a financial or investment service. The supplied business presentation does not make a licensing claim or provide a license number, so any sector-specific authorization should be confirmed where the proposed deployment requires it. This is a disclosure and verification matter, not evidence of deceptive conduct. No broker-related match was identified.

- Homepage title identifies “AI Intrusion Detection & Smart Surveillance Solutions | Refraime.”
- Hosting is on AS37611, AFRIHOST SP (PTY) LTD, South Africa; registrar: Afrihost.
- TLS certificate issued by YR2, validation level DV, valid to 2026-08-29.
- The homepage provides a contact workflow for demo or callback requests rather than direct payment or investment onboarding.

What to Verify Next

Before a commercial deployment, confirm the contracting legal entity, applicable sector permissions, data-processing responsibilities, and the scope of any promised local support through independent business records and contractual documentation. Technical and procurement teams should also review how camera data, alerts, remote access, and retention are handled.

- Homepage describes integration with existing cameras and remote monitoring.
- Homepage includes a contact form and cookie-consent controls relevant to an enterprise privacy review.

Summary Verdict

The site presents as a legitimate, established, and trustworthy corporate technology provider with a coherent business purpose and no observed scam or impersonation indicators. The combined content, behavioural, reputation, domain-history, and transport-security signals support normal interaction, including account or standard service use where offered.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer, while the observed edge address is 165.73.83.208 on AS37611, operated by AFRIHOST SP (PTY) LTD. The origin server was not observable in this analysis; this is consistent with the protective edge architecture and is not, by itself, a legitimacy concern.

Closing Assessment

Normal commercial engagement is appropriate, subject to ordinary procurement, privacy, and authorization checks proportionate to the intended surveillance deployment.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of refraime.co.za.

- The request stayed on refraime.co.za. It was not redirected to another domain. CLEAR
- Registration is published under Afrihost. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-30. NOTED

- The earliest public archive of this site is from 2022-11-18. CLEAR
- It is hosted on AFRIHOST SP (PTY) LTD, from a server in ZA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about refraime.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
