

Is regione.lombardia.it legit? TrustSniffer's high-trust assessment: 90/100

regione.lombardia.it

Verdict

90
OUT OF 100

HIGH TRUST

regione.lombardia.it appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 75%.

What this site appears to be

Official Regione Lombardia homepage providing news, regional services, events, and citizen information. Includes contact forms, cookie/privacy notices and links to official social profiles.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1997.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is the Regione Lombardia public-sector website, presenting regional news, healthcare and tax information, education and employment services, mobility resources, events, administrative notices, and citizen contact functions. Its apparent purpose is to provide institutional information and access to public services rather than to operate a commercial or investment business.

Scam/Impersonation Risk

No contradictions were observed. The available evidence contains no phishing, impersonation, or malicious-reputation indicators, and the homepage presents a coherent government/public-service function with contact and survey forms but no login or sensitive credential form. The site's identity is apparent and evidence-consistent, although the real-world operator identity is not independently verified; this is an uncertainty about confirmation, not an observed impersonation signal.

EVIDENCE

- Homepage: identified as a government/public-service page covering regional information, healthcare, taxation, education, mobility, and citizen services; no red flags were recorded.
- Homepage: no login form, hidden form, password-external form, wallet interaction, or sensitive form was detected.
- External reputation assessment: no malicious or suspicious detections, abuse reports, or blacklist matches were recorded; the domain also has an established global traffic footprint.
- Domain registration record: registered in 1996 and approximately 30.45 years old with Fastweb s.p.a. listed as registrar; archive history records 2,691 snapshots spanning 1997–2026, covering 30 tracked years.

Regulatory Verification Notes

The website's content is consistent with a regional public authority and includes institutional information, citizen services, contact functionality, and cookie/privacy notices. No commercial licence or financial-regulatory registration is claimed in the supplied page material; given the stated public-service model, that is not evidence of a scam, but the on-page material does not independently establish the operator's real-world identity. A separate broker-reputation dataset produced no match and should be treated only as contextual support, not as a legal or licensing determination.

EVIDENCE

- Homepage: provides public-sector information and services rather than commercial products or financial offerings.
- Homepage: includes contact functions and cookie/privacy notices, but the supplied material does not independently verify the operating legal entity.
- Transport encryption: Actalis Extended Validation TLS Server RSA CA 2025 issued an EV certificate identifying "Regione Lombardia," valid to 2026-12-26T14:28:49+00:00.
- External reputation assessment: no broker-dataset match was identified.

What to Verify Next

For credential or payment-related interactions associated with any linked service, independently confirm the relevant regional authority and service destination through an official government directory or an offline institutional contact route. Where a transaction or third-party service is involved, confirm the applicable merchant identity, terms, return arrangements, and payment-protection mechanisms before proceeding.

EVIDENCE

- Homepage: the presence of multiple public-service areas supports checking the specific service owner separately when a transaction or account action is initiated.
- Contact and privacy functions: provide an appropriate starting point for confirming the official support channel, while independent confirmation remains preferable for sensitive actions.
- Service context: the supplied material describes public administration rather than a commercial merchant, so transaction-specific protections should be assessed only where an external service is reached.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate public-service website with a high trust posture and low observed scam risk. The classification is strong, but it should not be interpreted as independent proof of the real-world operator's identity.

Infrastructure Integrity

The site is delivered through Fastly's CDN/WAF infrastructure, which is a mitigating control for exposure and traffic handling rather than proof of legitimacy. All observed addresses were CDN edge servers, and the origin server IP was not observable in this analysis.

EVIDENCE

- Hosting infrastructure: served from AS54113, FASTLY - Fastly, Inc., US.
- Network posture: 4 CDN edge IPs were observed and 0 likely origin IPs were identified.
- Technical transport: the site uses an EV TLS certificate issued by Actalis Extended Validation TLS Server RSA CA 2025.

Closing Assessment

Normal browsing and ordinary public-service use are proportionate to the available evidence; before entering credentials or making any payment through an associated service, complete the independent identity, terms, and payment-protection checks described above.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of regione.lombardia.it.

- The request stayed on regione.lombardia.it. It was not redirected to another domain. CLEAR
- Registration is published under Fastweb s.p.a.. CLEAR
- DNS for this domain is served by lombardia.it. NOTED
- The registration is paid up to 2027-04-26. NOTED
- The earliest public archive of this site is from 1997-04-04. CLEAR
- It is hosted on FASTLY, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [regione.lombardia.it](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
