Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This Portuguese-language website presents a paid service for musicians seeking to register band names and obtain related legal paperwork, with an affordability-focused landing page, claims of specialist lawyers and dispatch personnel, customer testimonials, and a contact form for requesting a quotation.

Scam/Impersonation Risk

The site's stated service model is coherent and the homepage contains no login form, hidden form, wallet function, or other overt phishing mechanism. However, this benign presentation is outweighed by confirmed external threat detections and a confirmed blacklist status: multiple security detections classify the domain as malicious, including Tier-1 detections associated with Fortinet and Sophos. No separate conflicting legal identity or brand-impersonation finding was established, but the external reputation evidence represents a material contradiction to the otherwise ordinary service presentation. Sensitive interaction should therefore be treated as unsafe.

EVIDENCE

- Homepage: a single contact form requests information for a no-obligation quotation; no login form or hidden sensitive form was detected.
- External reputation telemetry: 12 malicious detections were recorded among 17 effective evaluations, with a confirmed blacklist result.
- Behavioral inspection: two successful runs showed no wallet connection, credential form, clipboard hijacking, or cloaking behavior.

Regulatory Verification Notes

The homepage describes legal and registration assistance but does not claim a license, provide a license number, or identify a licensing authority. This is a regulatory-disclosure gap rather than, by itself, proof of fraud. The real-world operator remains unverified, so the service's on-page claims should not be treated as independently established. The domain is long-established and uses valid transport encryption, but those technical facts do not resolve the external reputation contradiction or establish legal authorization.

EVIDENCE

- Domain registration: registered 2016-11-01 and recorded as approximately 9.81 years old, with expiration on 2026-11-01.
- Hosting telemetry: served from AS31898, ORACLE-BMC-31898, Oracle Corporation, United States.
- TLS telemetry: DV certificate issued by YR1, valid to 2026-10-07T22:37:27+00:00.
- Homepage: claims a specialized team of lawyers and dispatch personnel but provides no license authority or license number.

What to Verify Next

Before any engagement, an independent check should confirm whether the individuals or organization providing the service are authorized to perform the advertised legal or registration work in the relevant jurisdiction. The quoted service scope, government filing responsibility, total charges, refund terms, and payment recipient should be obtained in writing. Contact details should be validated through an independent offline or official channel rather than relying solely on the website.

EVIDENCE

- Homepage: the service is initiated through a quotation request and followed by payment for registration assistance.
- Homepage: the stated professional basis is a team of lawyers and dispatch personnel specialized in music business.
- Regulatory disclosure: no licensing authority or license number is stated on the available service page.

Summary Verdict

The overall posture is **critical trust risk** because confirmed external malicious and blacklist evidence overrides the site's otherwise coherent service presentation and stable technical operation. The website's real-world

operator and authorization are not independently verified, and sensitive interaction is not appropriate on the available evidence.

Infrastructure Integrity

The website resolves to Oracle Corporation infrastructure in the United States on AS31898. No CDN or origin-candidate layer was detected; the hosting arrangement provides a normal, identifiable infrastructure path but is not evidence of legitimacy and does not offset the external reputation findings.

Closing Assessment

Interaction should remain limited to passive review until the external detections are resolved and the operator, authorization, payment destination, and service terms are independently confirmed; credentials, personal information, and payment details should not be submitted in the interim.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about registresuabanda.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
