- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Reporte Minero is a Chilean Spanish-language media portal covering mining, energy, exploration, sustainability, corporate developments, interviews, podcasts, and industry videos, with an apparent editorial and industry-information business model.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or malicious reputation findings were observed. The homepage presents coherent editorial content, including reporting on Chilean mining, copper and gold markets, sustainability, energy, interviews, and video programming; it contains no login form, sensitive form, wallet-connect function, or credential-harvesting behavior. Normal interaction with the site, including account login where offered, is appropriate.

- The homepage identifies the publication as “El portal de minería en Chile” and displays dated news, reports, podcasts, and videos.
- Behavioral testing recorded no hidden forms, external password forms, wallet activity, clipboard manipulation, cloaking, or suspicious inline scripts.
- The domain is registered from 2013 (~13.47 years old), with the registered owner recorded as GERMAN RICARDO LOPEZ VALDES.

Regulatory Verification Notes

The site functions as an editorial media portal rather than a financial-services platform. The supplied pages do not present a regulatory license claim or license number; this is a limited disclosure point for any formal commercial or corporate engagement, not evidence of deception. The site's established editorial focus, sustained historical presence, clean external reputation, and consistent presentation support its legitimacy.

- The homepage contains substantial Chilean mining and energy coverage, including corporate developments, production, sustainability, and industry events.
- The domain has 216 archive snapshots spanning 2016–2026, covering 11 tracked years.
- The site's hosting infrastructure is identified as AS13335, Cloudflare, Inc.; its TLS certificate is issued by YE2, uses DV validation, and is valid to 2026-09-24.
- The homepage contains no stated financial-service license, registration number, or regulated-investment offering.

What to Verify Next

Before a formal partnership, advertising purchase, subscription commitment, or other material commercial engagement, independently confirm the operating entity and applicable Chilean business or media registration

through authoritative records, and validate the publication's official contact channels using information obtained independently of the website.

- The homepage provides the publication identity and subscription pathway but does not specify the monetization structure.
- The homepage offers editorial sections labelled News, Videos, Reports, Podcasts, Explorations, and Subscriptions.
- No broker-affiliation match or adverse third-party reputation signal was identified in the supplied assessment.

Summary Verdict

Reporte Minero presents as a legitimate, established, trustworthy specialist news and media publication. Its coherent content, sustained presence, clean reputation, and consistent technical operation support a high-confidence trust posture for normal use.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with observed addresses resolving to Cloudflare edge servers and no origin candidate identified. This reduces direct exposure of the origin environment and is a mitigating security control, though it is not by itself proof of legitimacy.

- Hosted on AS13335 (CLOUDFLARENET – Cloudflare, Inc., US).
- Four observed IP addresses were identified as CDN edge addresses; likely origin IP count was 0.
- TLS certificate issuer: YE2; validation level: DV; valid to 2026-09-24.

Closing Assessment

Standard browsing, subscription activity, and account interaction are proportionate to the site's established trust posture; material commercial engagements should follow the organization's normal vendor-onboarding checks.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about reporteminero.cl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
