Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2003.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is the promotional site for Residence Beaurivage, a seaside residence in San Benedetto del Tronto offering vacation apartments, accommodation services, prices, offers, contact information, and location details, with apparent revenue generated through direct reservations and related hospitality services.

Scam/Impersonation Risk

No contradictions were observed across the available evidence: there is no indication of phishing, brand impersonation, conflicting legal identities, or a confirmed blacklist result. The homepage presents a conventional hospitality offering, and technical review found no login form, credential-collection mechanism, hidden sensitive form, wallet interaction, cloaking, or clipboard activity. One external reputation result classified the domain as malicious, but the signal was isolated and explicitly treated as unconfirmed; it therefore remains a soft reputational signal rather than evidence of a scam or impersonation operation.

EVIDENCE

- The homepage describes Residence Beaurivage, apartments, accommodation services, and visitor contact information without presenting phishing or credential-harvesting content.
- Browser interaction recorded 0 wallet-connect runs, 0 wallet-sensitive runs, 0 wallet-drainer runs, 0 hidden forms, and 0 password forms submitted to external destinations.
- External reputation telemetry recorded 1 malicious result, 0 suspicious results, and no confirmed blacklist or phishing result.

Regulatory Verification Notes

The site's footer identifies "Hotel Beaurivage" and displays a business tax identifier, which is consistent with a hospitality business presentation; however, the real-world operator has not been independently verified. No license claim or license number is supplied, and the available material does not establish a regulatory authorization requirement for the advertised accommodation activity. The site is therefore apparently legitimate and evidence-consistent, while its legal identity and any applicable local registration should remain subject to ordinary independent confirmation. The long-standing registration, stable technical service, and valid transport encryption provide supporting establishment signals, but they do not prove the operator's identity.

EVIDENCE

- Domain registration: 2003-07-11; age 23.13 years; registrar Shellrent s.r.l.
- Hosting infrastructure: AS16276, OVH - OVH SAS, FR.
- TLS certificate: issuer YR1; DV validation; valid to 2026-10-20T05:06:45+00:00.
- The homepage footer displays "Hotel Beaurivage" together with a business tax identifier, while no license number is presented.

What to Verify Next

Before any credential or payment interaction, an independent check should confirm that the accommodation, operator name, and displayed business identification correspond to the intended property through a local tourism, business, or municipal source. The Prices, Offers, and contact materials should be checked for cancellation, refund, booking, and payment-protection terms, and contact channels should be confirmed through an independently sourced telephone number or other offline route.

EVIDENCE

- The homepage and "Dove Siamo" materials provide the property description and location details to reconcile against an independent local listing.
- The "Prezzi" and "Offerte" sections are the relevant pages for confirming reservation conditions, cancellation terms, and quoted charges.
- The "Contatti" section is the relevant site page for comparing contact details with an independently obtained source.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate hospitality website and supports a high-trust, low-risk posture. The assessment does not independently prove the real-world operator identity, so the site’s legitimacy should be understood as evidence-consistent rather than conclusively established.

Infrastructure Integrity

The site is protected by CDN/WAF infrastructure, with observed traffic presented through an edge address and no origin-server candidate identified in the analysis. This reduces direct exposure of the underlying service and is a mitigating technical control, but it is not proof of business legitimacy.

Closing Assessment

Ordinary engagement is proportionate to the assessed posture, provided independent merchant-identity, return or cancellation, and payment-protection checks are completed before credentials or payment details are submitted.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of residencebeaurivage.it.

- The request stayed on residencebeaurivage.it. It was not redirected to another domain. CLEAR
- Registration is published under Shellrent s.r.l.. CLEAR
- DNS for this domain is served by serverlet.it. NOTED
- The registration is paid up to 2027-02-24. NOTED
- The earliest public archive of this site is from 2003-12-13. CLEAR
- It is hosted on OVH, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about residencebeaurivage.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
