Full analysis

Overview

This website is Revenda Mais, a Brazilian SaaS platform for vehicle dealerships that presents online tools for CRM, electronic invoice issuance, listing-portal integration, dealership websites, vehicle appraisal, inspections, inventory, financial management, and customer-lead administration, with demonstrations and account access as its primary commercial entry points.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent business-to-business software model, its page content contains no reported phishing, impersonation, or malicious-behaviour indicators, and external reputation checks returned no malicious or suspicious detections. The apparent legitimacy is therefore evidence-consistent, although the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage identifies Revenda Mais as a vehicle-dealership management system and directs visitors toward a demonstration-led SaaS engagement.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no blacklist or phishing result.
- The domain registration record dates to 2004, making the domain approximately 22.51 years old.
- Historical records contain 225 archive snapshots spanning 2016–2026, covering 11 tracked years.

Regulatory Verification Notes

The available material supports an established commercial software service, not a verified regulated financial provider. The site's on-page legal and regulatory disclosure state is unclear, and no license or registration number is claimed in the supplied content; this is a transparency item for ordinary business due diligence, not evidence of a scam. Registration data associates the domain with Marchetti e Marchetti Tecnologia Ltda, but that association does not independently prove the operator's present legal identity or corporate relationship to the website.

EVIDENCE

- The homepage and product materials describe subscription SaaS services for vehicle dealerships rather than a financial or brokerage offering.
- The site is hosted through AS47583, AS-HOSTINGER — Hostinger International Limited, CY.
- The site's TLS certificate is issued by YE2, uses domain validation (DV), and is valid through 2026-11-06.
- The reviewed third-party broker context returned no match; this is reputational context only and is not a licensing determination.

What to Verify Next

Before entering into a commercial subscription, the prospective customer should confirm the contracting entity and billing party against independent corporate records, review the applicable terms, cancellation and return provisions, and confirm the official support channels through an independently sourced business contact. Before submitting credentials or payment details, payment-protection arrangements and the identity of the merchant receiving funds should also be checked.

EVIDENCE

- The site provides dedicated paths for plans, demonstrations, account creation, and access, making the contracting and onboarding terms the appropriate materials for review.
- The available disclosure state is unclear, so the legal entity, service terms, cancellation provisions, and billing arrangements should be obtained before commitment.
- The homepage uses a single contact/demo lead-capture form and does not expose a sensitive login form in the observed landing-page flow.

Summary Verdict

The overall posture is **high trust and low risk**, and the evidence is consistent with an established, apparently legitimate website. Its business purpose and operating presentation are coherent, with no observed contradiction that would indicate scam or impersonation activity; the remaining qualification concerns independent confirmation of the real-world operator rather than a detected security threat.

Infrastructure Integrity

The site resolves to two likely origin addresses without a detected CDN edge or identified CDN/WAF layer. This provides less edge-level shielding than a CDN-fronted deployment, but the directly observed hosting arrangement is not, by itself, evidence of maliciousness.

Closing Assessment

Normal business evaluation is proportionate, provided independent merchant-identity, contractual, return-policy, and payment-protection checks are completed before credential or payment interactions.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about revendamais.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
