- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

revolutioniseSPORT is a sports-management SaaS platform for clubs, associations, governing bodies, and industry organisations. Its homepage presents tools for memberships, finances, events, communications, websites, competitions, governance, and online shops, with a free-trial pathway and subscription-based service model.

Scam/Impersonation Risk

No contradictions were observed across the available website, reputation, behavioural, and historical signals. The homepage is consistent with a professional sports-management service rather than a phishing, investment, or impersonation operation; it contains no login form, hidden form, external password form, wallet-connect behaviour, or detected brand-impersonation indicators. Some externally directed browser requests and posts were observed, but the behavioural assessment treated these as benign site activity: there were no cloaking indicators, clipboard-hijacking activity, wallet-drainer runs, or sensitive hidden forms. The available evidence therefore supports an established, apparently legitimate website, while not independently proving the real-world operator's identity.

EVIDENCE

- The homepage describes sports-management functionality and a free trial, with no scam or phishing indicators identified.
- Browser testing recorded no hidden forms, external password forms, wallet-provider activity, or cloaking.
- The domain was registered in 2013 and is approximately 13.23 years old.
- Historical records contain 397 archive snapshots spanning 2013–2026, covering 14 years.

Regulatory Verification Notes

The service appears to provide ordinary software functionality for sports organisations rather than a regulated financial product. The available legal navigation includes terms of service, privacy policy, and contact pages; however, no licensing or registration claim is identified in the supplied site content, so the legal and commercial disclosure position should be treated as requiring ordinary business verification rather than as a regulatory endorsement. The operator identity remains independently unverified, despite consistent technical indicators connecting the service to SPORTSGRID PTY LTD. No adverse broker match or confirmed malicious reputation signal was identified.

EVIDENCE

- The homepage links to terms of service, privacy policy, and contact pages.
- The site's stated functions are memberships, invoicing, ticketing, communications, websites, competitions, governance, and online shops.
- The domain registration record lists Web Address Registration Pty Ltd as registrar and SPORTSGRID PTY LTD as owner.
- The site is hosted on AS16509, Amazon.com, Inc.; its TLS certificate is issued by Trustico RSA OV SSL CA 2 at OV validation level and is valid to 2026-12-27.

What to Verify Next

Before establishing a supplier relationship or enabling payment-related features, the prospective customer should confirm the contracting entity, applicable service terms, refund or cancellation provisions, and payment-protection arrangements through the site's legal and contact pages. Any claimed corporate or regulatory status should be checked against the relevant official registry, and contact details should be confirmed through an independent business record or offline channel before credentials or payment information are exchanged.

EVIDENCE

- The homepage provides links to the terms, privacy, and contact pages needed for contractual review.
- The service includes online payments, invoicing, ticketing, and shop functionality, making payment and merchant-identity checks relevant.
- The site offers a free-trial pathway, allowing service scope and contracting details to be reviewed before a paid commitment.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website supporting a low-risk, high-trust posture. No scam, phishing, impersonation, or other identity contradiction was observed, although the real-world operator identity is not independently verified.

Infrastructure Integrity

The website is protected by AWS CloudFront CDN/WAF infrastructure, with observed edge addresses assigned to AS16509, Amazon.com, Inc. The origin server was not observable through the protected delivery architecture; this is a normal mitigating security characteristic of CDN deployment and is not, by itself, evidence of wrongdoing.

Closing Assessment

Normal evaluation of the service is proportionate, with independent confirmation of the contracting business, terms, and payment protections completed before credential or payment interactions.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of revolutionise.com.au.

- The request stayed on revolutionise.com.au. It was not redirected to another domain. CLEAR
- Registration is published under Web Address Registration Pty Ltd. CLEAR
- DNS for this domain is served by com.au, across 4 name servers. NOTED
- The earliest public archive of this site is from 2013-05-16. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about revolutionise.com.au at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
