

Is reycom.cr legit? TrustSniffer's high-trust assessment: 100/100

reycom.cr

Verdict

100

OUT OF 100

HIGH TRUST

reycom.cr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not ScamLow Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Corporate website for RE&COM, a regional telecom operator in Costa Rica offering fiber-optic internet, dedicated links, Wi-Fi/FTTH design, CCTV and corporate connectivity. Contains pricing, plans, coverage checker, contact and support information, and client portal access.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

RE&COM is a Costa Rican telecommunications provider presenting residential and business connectivity services, including fiber-optic internet, dedicated links, Wi-Fi and FTTH design, CCTV, coverage checking, customer support, and a client portal. Its apparent business model is recurring subscription services supplemented by installation charges and dedicated-link rentals.

Scam/Impersonation Risk

No blacklist, phishing, malware, or brand-impersonation contradictions were observed. The site's presentation is consistent with a regional Internet service provider: it provides service plans, coverage information, support functions, contact facilities, and customer-account access rather than presenting anomalous investment, cryptocurrency, or prize-related offers. The available evidence supports an apparently legitimate and established site, although the real-world operator identity has not been independently verified.

EVIDENCE

- The homepage identifies the business as “RED Y COMUNICACIONES RE&COM DEL SUR S.A.” and presents fiber, corporate connectivity, coverage, support, and customer-portal functions.
- The domain registration record shows registration in 2019 and an age of approximately 7.5 years.
- Historical archive coverage spans 2020–2026, representing 7 years tracked, with 44 recorded snapshots.
- External security checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing hit.

Regulatory Verification Notes

The site provides an “Información de la empresa” area, policies and regulations, payment information, contact details, and service-support content. No telecommunications license or registration number is stated in the supplied site evidence, so regulatory authorization remains a transparency item for independent confirmation rather than evidence of a scam. The displayed corporate name is consistent across the available page content, and no separate identity contradiction was identified. A separate broker-reputation dataset produced no match; this is contextual reputational information, not a licensing determination.

EVIDENCE

- The homepage and company-information content identify RE&COM DEL SUR S.A. as the presented service operator.
- The site's transport encryption uses a DV certificate issued by WE1, valid to 2026-09-24.
- Hosting is served through AS13335, operated by CLOUDFLARENET — Cloudflare, Inc., US.
- The policies, regulations, payment, and contact sections provide the principal areas in which service terms and regulatory disclosures can be reviewed.

What to Verify Next

Before credential or payment interactions, independently confirm that the presented company is the authorized telecommunications provider for the relevant service area through the applicable Costa Rican regulatory or corporate registry. The prospective customer should also reconcile the contracting entity, service terms, installation charges, cancellation or service-remedy provisions, and available payment protections, and should confirm official support channels through an independent route.

EVIDENCE

- The company-information page is the appropriate source for reconciling the contracting legal entity.
- The policies-and-regulations pages should be checked for service obligations, remedies, and cancellation conditions.
- The payment-information and contact pages should be reconciled with the independently confirmed merchant identity before funds or credentials are provided.

Summary Verdict

Available evidence supports a **high-trust, low-risk posture** for an apparently legitimate established website. No contradictory scam or impersonation indicators were identified, but the operator’s real-world identity remains independently unverified.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a meaningful mitigating control by placing the observed service behind edge infrastructure; the analysis observed CDN edge addresses rather than a directly exposed origin server. This supports infrastructure resilience and reduces direct origin exposure, but it is not, by itself, proof of operator legitimacy.

Closing Assessment

Ordinary browsing and service evaluation appear proportionate, while independent merchant-identity, contractual, and payment-protection checks should be completed before submitting credentials or making payments.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of reycom.cr.

- The request stayed on reycom.cr. It was not redirected to another domain. CLEAR
- Registration is published under NIC-REG1. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-22. NOTED
- The earliest public archive of this site is from 2020-08-15. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about reycom.cr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
