

Is riccbieber.com a scam? TrustSniffer's high-risk assessment: 0/100

riccbieber.com

Verdict

0

OUT OF 100

CRITICAL RISK

riccbieber.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Simple personal homepage for 'Ricc Bieber' containing a short blog post excerpt, RSS link, and contact prompt. No transactional features or account prompts present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

What riccbieber.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

RiccBieber.com presents a simple personal homepage for "Ricc Bieber," with a brief blog excerpt, an RSS link, and a contact prompt; its apparent purpose is personal publishing or portfolio presentation rather than commerce, account services, or financial activity.

Scam/Impersonation Risk

The site carries a **critical interaction risk** despite its benign-looking homepage. External reputation telemetry records 13 malicious detections and one suspicious detection, including Tier-1 detections from Kaspersky and Sophos, and the domain is confirmed on external blacklists. This creates a material contradiction between the low-risk personal-blog presentation and the external threat findings; the absence of a login form, credential prompt, wallet connection, or transaction flow on the captured homepage does not offset those findings. No separate legal-entity identity contradiction or brand-impersonation finding was established, but the real-world identity associated with the site remains unverified.

EVIDENCE

- The homepage is titled “Ricc’s Homepage,” identifies “Ricc Bieber,” and contains a short blog entry, RSS link, copyright notice, and “Contact Me” prompt.
- External reputation telemetry recorded 13 malicious results, 1 suspicious result, and Tier-1 detections from Kaspersky and Sophos; blacklist status was positive.
- The domain was registered on 2016-08-04 and is 10.05 years old.

Regulatory Verification Notes

The available content supports a personal blog or portfolio classification and shows no visible commercial offering, account service, or regulated financial product. No license claim, licensing authority, or registration number is presented in the supplied site content, so regulated status cannot be established from the website. The published name is an on-site identity claim rather than independent proof of the operator’s real-world identity. This is a verification gap, not by itself evidence of a scam; the decisive concern remains the separate external threat signal described above.

EVIDENCE

- The homepage contains approximately 201 characters of visible text and no sensitive forms, login form, or external password destination.
- The site content describes a personal blog/portfolio model with no clear transaction flow.
- Hosting resolved to AS22611, InMotion Hosting, Inc., US; the domain registrar is TLDS LLC. d/b/a SRSPPlus.
- The site uses a DV TLS certificate issued by YR2, valid through 2026-11-09.

What to Verify Next

Before any sensitive interaction, an organization should independently confirm that the domain is the intended official channel for Ricc Bieber through a separately established contact route, and should obtain any applicable legal or business registration details from authoritative registries rather than relying on the homepage. Security teams should also compare the current site, hosting endpoint, and relevant files against the confirmed external detections before permitting credential, financial, or other sensitive use. Generic support or contact channels should be confirmed through an independent, offline route.

EVIDENCE

- The homepage provides only a “Contact Me” prompt and does not supply independently verified organizational details.
- No license claim, licensing authority, or registration number is visible in the supplied site content.
- Runtime inspection observed no login form, hidden form, wallet connection, clipboard-write activity, or external password form on the captured page.

Summary Verdict

The overall posture is critical, with the available evidence unsuitable for trusting sensitive interactions. The site’s simple personal-blog presentation does not reconcile the confirmed external threat and blacklist findings, while

operator identity remains unverified.

Infrastructure Integrity

The site resolves directly to a single likely origin IP, with no CDN or WAF detected and no edge-IP layer identified. This provides limited infrastructure-based mitigation and should be treated only as a technical exposure observation, not as evidence of legitimacy.

Closing Assessment

Sensitive use should remain blocked unless independent identity confirmation and a satisfactory security review resolve the external threat findings.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of riccbieber.com.

- The request stayed on riccbieber.com. It was not redirected to another domain. CLEAR
- Registration is published under TLDS LLC. d/b/a SRSPlus. CLEAR
- DNS for this domain is served by inmotionhosting.com, across 2 name servers. NOTED

- The registration is paid up to 2027-08-04. NOTED
- The earliest public archive of this site is from 2018-08-06. CLEAR
- It is hosted on INMOTION, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about riccbieber.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
