Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is an informational local-service site presenting Richmond Creche & Kindergarten as a community-run, not-for-profit childcare and kindergarten centre in Richmond, Victoria, with material about its educational philosophy, programs, enrolment process, community activities, testimonials, location, and contact arrangements.

Scam/Impersonation Risk

The site's visible content is coherent with a childcare organisation and does not show a login form, payment workflow, wallet connection, phishing form, or signs of brand impersonation. However, this benign presentation is materially contradicted by confirmed external threat detections: the domain is recorded as blacklisted by two external sources, with multiple malicious and suspicious classifications. This is a **confirmed external reputation contradiction** and takes precedence over the site's otherwise ordinary service-oriented appearance. No conflicting legal-entity names or direct impersonation indicators were observed in the supplied pages.

EVIDENCE

- The homepage and About content describe a community-run, not-for-profit childcare and kindergarten centre, including program information, enrolment material, philosophy, and parent-facing testimonials.
- External reputation checks recorded 5 malicious detections and 1 suspicious detection from 11 evaluated results; the domain was also identified by two external blacklist sources.
- The homepage behavior assessment found no login form, hidden form, password-exfiltration form, wallet connection, wallet-drainer behavior, clipboard manipulation, or cloaking.

Regulatory Verification Notes

The site presents a clear operating concept and publishes centre information through its About, Enrolment, and Contact pages, but the supplied content does not identify a childcare licence, registration number, or specific regulatory authority. That omission is a verification gap rather than independent evidence of fraud. The apparent site identity is consistent with the registrant name recorded in registration data, but the real-world operator has not been independently verified. The valid transport certificate and identifiable hosting arrangements are technical controls, not proof of regulatory standing or organisational identity.

EVIDENCE

- Registration data lists Synergy Wholesale Accreditations Pty Ltd as registrar and RICHMOND CRECHE AND KINDERGARTEN INC as the registrant.
- The site is served from AS45638, operated by SYNERGYWHOLESALE-AP — SYNERGY WHOLESALE PTY LTD, AU.
- The site's TLS certificate is issued by YR2, uses DV validation, and is valid to 2026-11-05 06:24:46 UTC.
- The Contact page provides a physical address, telephone contact, and email contact; the supplied legal and enrolment content does not display a licence or registration number.

What to Verify Next

Before any sensitive interaction, an independent check should confirm that the organisation named on the site is the same entity authorised to operate the childcare service. The relevant Victorian childcare or early-childhood regulatory registry should be consulted directly, and the centre's official contact channels should be confirmed through an independently sourced telephone number or offline record. Any request for credentials, financial information, unusual payments, or sensitive personal documentation should be handled only after those checks and after the external reputation contradiction has been resolved.

EVIDENCE

- Use the Contact page's published location and telephone details as a starting point, but validate them through an independent source.
- Check the relevant Victorian regulatory register for the centre's operating status, legal name, and authorised location.
- Compare the independently confirmed organisation details with the identity shown on the About and Enrolment pages before proceeding with sensitive transactions or data submission.

Summary Verdict

The overall posture is critical, with sensitive interaction risk driven by confirmed external threat detections and blacklist status. The site appears operational and its public-facing content is consistent with a childcare service, but that apparent legitimacy does not establish that the domain is safe for credentials, financial activity, or submission of sensitive information.

Infrastructure Integrity

The domain resolves to a single likely origin address and no CDN edge layer was detected. This infrastructure profile provides limited protective separation; the presence of valid TLS and identifiable hosting should be treated only as mitigating technical context, not as evidence that the site or its operator is legitimate.

Closing Assessment

Restrict activity to passive viewing until the organisation’s regulatory status, operator identity, and external reputation contradiction have been independently confirmed.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about richmondcreche.com.au at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
