

Is rideofy.com a scam? TrustSniffer's high-risk assessment: 0/100

rideofy.com

Verdict

0

OUT OF 100

CRITICAL RISK

rideofy.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Minimal WordPress site named Rideofy showing shop/cart, a sample blog post and default WordPress text. No product listings or financial flows are visible.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

Rideofy

Mindblown: a blog

What rideofy.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a minimal WordPress storefront branded “Rideofy,” presenting shop, cart, checkout, and account links alongside a sample blog post and default WordPress text. Its apparent purpose is ecommerce, although the available homepage does not show actual product listings or transaction details.

Scam/Impersonation Risk

The site carries a **material sensitive-interaction risk** because external security intelligence records confirmed malicious classifications and blacklist status, including detections associated with Fortinet and Sophos. These are direct reputational and security contradictions even though the homepage itself is sparse, shows no obvious impersonated brand, and contains no visible login or payment form. The available evidence does not establish a confirmed brand impersonation or phishing page, but the external detections are sufficiently serious that the site should not be treated as safe for credentials, account access, or financial activity.

EVIDENCE

- External security evaluation recorded 12 malicious classifications and 0 suspicious classifications; Fortinet and Sophos were among the flagged vendors.
- The domain is recorded as blacklisted by two external sources.
- Domain registration dates to 2017-08-31, with an age of 8.97 years.
- The archival record contains 52 snapshots spanning 2017-11-04 through 2025-11-22, covering 9 years.

Regulatory Verification Notes

The available site content does not independently identify a real-world operator, licensing authority, or license number. The business model is therefore not independently substantiated, and identity verification remains incomplete. Registration privacy is an administrative limitation rather than proof of misconduct; however, it provides no additional basis for connecting the site to a regulated or accountable entity. The site's valid transport encryption and established registration history are positive technical indicators, but they do not counteract the external security findings or establish regulatory legitimacy.

EVIDENCE

- The homepage and visible WordPress content provide no operator name, regulatory authority, or license number.
- The domain is registered through GoDaddy.com, LLC; the registrant is displayed as Registration Private through Domains By Proxy, LLC.
- Hosting resolves to AS13335, CLOUDFLARENET - Cloudflare, Inc., US; the TLS certificate is issued by WE1 at DV validation level and is valid to 2026-09-30T17:48:45+00:00.

What to Verify Next

Independent confirmation of the operating entity should precede any interaction involving an account, credentials, checkout, or payment. Any claimed business registration or sector-specific authorization should be matched against the relevant official registry using independently obtained contact details, and the site's contact and support channels should be confirmed through an offline or separately verified route. Until those checks succeed, the appropriate posture is read-only review without submission of sensitive information.

EVIDENCE

- The homepage exposes cart, checkout, and account navigation, while behavioral testing found no login form or sensitive form submission.
- The homepage contains only a generic "Get In Touch" contact prompt and does not provide a verifiable regulatory reference.
- Behavioral testing recorded 0 external XHR requests, 0 external POST requests, and 0 wallet-connection runs during the observed sessions.

Summary Verdict

The website should be treated as a **critical sensitive-interaction risk**. Apparent ecommerce functionality is not supported by sufficient operator, regulatory, or security assurance, and the confirmed external threat and

blacklist signals dominate the assessment. The site’s real-world identity and legitimacy remain unverified.

Infrastructure Integrity

The website is protected by Cloudflare’s CDN/WAF infrastructure. All observed addresses were Cloudflare edge servers, with 4 edge IPs identified and 0 likely origin IPs; this reduces direct exposure of the hosting origin but is only a mitigating infrastructure characteristic and is not evidence of legitimacy.

Closing Assessment

Sensitive interaction should be suspended unless independent identity, authorization, and contact-channel checks produce reliable corroboration; credential, account, and payment activity should not proceed on the basis of the site’s current presentation.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%
No on-site identity signals detected	

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of rideofy.com.

- The request stayed on rideofy.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-08-31. NOTED
- The earliest public archive of this site is from 2017-11-04. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rideofy.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
