

Is riegotec-chile.cl legit? TrustSniffer's high-trust assessment: 100/100

riegotec-chile.cl

Verdict

100

OUT OF 100

HIGH TRUST

riegotec-chile.cl appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

Business website for Riegotec-Chile describing irrigation and mining-related engineering services, contact details, gallery and company mission. Contains a contact form and clear address/phone/email information.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Riegotec-Chile is a corporate website for a Chilean engineering and manufacturing business serving agriculture and mining, presenting technified irrigation projects, hydraulic engineering, polyethylene pipe manufacturing, equipment sales, and related project or service-contract opportunities through an inquiry-based business model.

Scam/Impersonation Risk

No contradictions were observed: the site was not identified as phishing, impersonating another brand, or exhibiting malicious abuse patterns. Its corporate presentation, business-specific content, contact workflow, gallery, and links to established social platforms are consistent with a conventional B2B operating model rather than a credential-harvesting or deceptive interaction pattern. The available evidence supports an apparently legitimate site, although it does not independently prove the real-world operator's identity.

EVIDENCE

- The homepage describes irrigation engineering, agricultural solutions, mining hydraulic design, and polyethylene pipe manufacturing without presenting a login, wallet-connection, investment, or other sensitive-action workflow.
- The site's contact page contains a standard contact form; technical analysis identified no hidden forms, password-external forms, cloaking, wallet-drainer activity, or suspicious inline scripts.
- The domain has an authoritative age of 5.793292265571527 years.

Regulatory Verification Notes

The site presents itself as an engineering and manufacturing business rather than as a financial or otherwise regulated service. The reviewed pages do not state a licensing authority, licence number, or equivalent formal registration disclosure, so the principal issue is a **verification gap** concerning corporate and sector-specific credentials, not evidence of deception. Independent operator identity remains likely rather than verified. The available third-party context does not produce a broker match, and no contradictory reputational signal was identified.

EVIDENCE

- The “Nosotros” and business-unit pages describe the company mission and services but do not provide a named licensing authority or licence number.
- The site is hosted on AS263702, identified as “GRUPO ZGH SPA, CL.”
- The site uses a DV TLS certificate issued by YR2, valid to 2026-10-28T12:59:52+00:00.

What to Verify Next

Before a commercial engagement, the counterparty should independently confirm the legal entity behind the trading name and validate the published address and telephone details through an offline or independently sourced channel. For any project requiring regulated engineering, environmental, safety, supplier, or product certification, the relevant Chilean registry or issuing body should confirm the applicable credentials. Contracting parties should also obtain written scope, warranty, delivery, return, and payment-protection terms before transferring funds or submitting account credentials.

EVIDENCE

- The contact page publishes a physical address and telephone number that can be checked independently.
- The site provides “Nosotros,” “Unidades de Negocio,” and “Contacto” pages, creating specific points for counterparty and service-scope verification.
- The site contains one contact form and no login form, so prospective engagement is presented as an inquiry process rather than an authenticated account workflow.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. The conclusion concerns the website's observed legitimacy and technical behavior; it should

not be treated as independent proof of the operator’s real-world identity.

Infrastructure Integrity

The site resolves directly to a single hosting address without a detected CDN or WAF edge layer. This provides less intermediary infrastructure than a CDN-fronted deployment, but it is a neutral architectural characteristic and does not contradict the otherwise favorable assessment.

EVIDENCE

- Resolved infrastructure consists of 1 IP address, 207.210.102.110, with 0 detected edge IPs and no CDN detected.
- Hosting is provided through AS263702, “GRUPO ZGH SPA, CL,” with the hosting country recorded as US.

Closing Assessment

Routine independent counterparty, contractual, and payment-protection checks remain appropriate before credential or payment interactions; subject to those ordinary checks, the site presents a proportionate basis for normal prospective business engagement.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of riegotec-chile.cl.

- The request stayed on riegotec-chile.cl. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2020-11-04. CLEAR
- It is hosted on AS263702, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about riegotec-chile.cl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
