

Is rinse.cc legit? TrustSniffer's high-trust assessment: 75/100

rinse.cc

Verdict

75

OUT OF 100

HIGH TRUST

rinse.cc appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Simple coming-soon / marketing landing page for rinse.cc promoting an AI site builder, offering 50 free credits and an email signup. Contains a contact/newsletter form and cookie/reCAPTCHA notices.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

RINSE.CC

What rinse.cc served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2018.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

rinse.cc is a coming-soon marketing website for an AI-powered site builder, presenting the “Airo AI Builder,” a promise to move from idea to live website quickly, 50 free credits, and an email signup for launch updates, promotions, and related information.

Scam/Impersonation Risk

No contradictions were observed: the supplied evidence shows no phishing, impersonation, blacklist, or conflicting-identity indicators. The homepage presents a conventional SaaS landing page rather than a credential-collection or financial-service interface, and no sensitive form, wallet connection, or hidden form was observed. A reputational signal exists against an Amazon-hosted shared-infrastructure IP, but it is expressly attributed to the shared CDN/provider environment rather than to rinse.cc itself; the signal therefore does not establish malicious activity by this website.

EVIDENCE

- The homepage is classified as a landing/coming-soon page and promotes an AI site builder with 50 free credits; no fraud indicators were identified in the page content.
- The homepage contains one contact/newsletter form, with no login form, password field, hidden form, wallet interaction, or sensitive submission flow observed.
- The domain's archive-reconciled age is 18.99794661190965 years.
- Seven abuse reports concern shared Amazon CDN infrastructure at 13.248.243.5, with a confidence score of 15 and attribution recorded as shared infrastructure.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate SaaS website, but the real-world operator identity is not independently verified. The landing page provides a copyright notice and general product description, but does not clearly identify a legal operating entity, registration number, or applicable licensing information; for this type of software service, that is a transparency and merchant-identity verification gap rather than evidence of a scam. Registration is handled through GoDaddy.com, LLC, while the registrant uses a privacy service as an administrative arrangement. The available third-party broker context contains no matching profile and should not be treated as a licensing determination.

EVIDENCE

- The site's registration registrar is GoDaddy.com, LLC.
- The site is served from AS16509, Amazon.com, Inc., US.
- TLS uses GoDaddy TLS Intermediate CA DV - R1v1 with DV validation and is valid to 2026-10-06T04:34:44+00:00.
- The homepage displays "Copyright © 2026 rinse.cc - All Rights Reserved" but does not display a clearly identified legal entity or license number.

What to Verify Next

Before credential or payment interactions, independently confirm the operating entity behind rinse.cc and review the service's terms, privacy practices, cancellation conditions, refund position, and payment-protection options. Any future account or purchase workflow should be checked to ensure that the destination remains the official rinse.cc service and that support channels can be confirmed through an independent route.

EVIDENCE

- The homepage currently describes the service as "Launching Soon," so the operational terms of the product are not yet fully presented.
- The visible form is limited to contact and newsletter submission rather than account creation or payment.
- The page references Google reCAPTCHA, cookie use, and linked privacy and terms notices, which should be reviewed before personal information is submitted.

Summary Verdict

rinse.cc has a **high-trust, low-risk posture** on the available evidence and is apparently legitimate for its stated SaaS purpose. The classification is supported by the absence of contradictory abuse patterns and by consistent page, behavioral, and infrastructure signals, while operator identity remains independently unverified.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, with observed addresses functioning as CDN edge servers and no origin candidate identified in this analysis. This provides a meaningful exposure-mitigation layer but is a protective control rather than proof of legitimacy; the underlying hosting environment is Amazon.com, Inc.

Closing Assessment

Normal exploratory use is proportionate, but independent operator, contractual, and payment-protection checks should be completed before submitting credentials or making paid commitments.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 7 reports on hosting IP 13.248.243.5 (Amazon Technologies Inc., Content Delivery Network), 15% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of rinse.cc.

- The request stayed on rinse.cc. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-08. NOTED
- The earliest public archive of this site is from 2018-05-24. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rinse.cc at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
