- Public web-archive history exists since 2019.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the corporate portal for RioMar Trade Center, a commercial office complex in Recife, Brazil, presenting building amenities, corporate event facilities, a professional directory, tenant services, directions, and condominium-administration functions.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or other fraud indicators were observed. The homepage's practical functions—including event-space reservations, professional searches, access to duplicate condominium payment slips, and the “Minha Conta” tenant area—are consistent with the stated operation of a managed commercial property. Historical and external-reputation evidence further supports a stable, legitimate web presence rather than a recently created or repurposed property.

- The domain was registered on 18 August 2017 and is approximately nine years old.
- The web archive contains 60 snapshots from 7 May 2019 to 19 May 2026, spanning eight tracked years, with no detected suspicious repurposing.
- The homepage presents a coherent corporate-property service model and contains no sensitive form, hidden form, cloaking, cryptocurrency functionality, or wallet interaction.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and 0 reported hosting-IP abuse incidents; the domain also has an established top-one-million traffic presence.

Regulatory Verification Notes

The homepage identifies the operating entity as “SUBCONDOMINIO DO COMPLEXO EMPRESARIAL RM TRADE CENTER” and publishes CNPJ 20.755.190/0001-64, a Recife street address, telephone contact, and business-domain email. These disclosures provide a concrete legal and operational identity consistent with the property-management purpose. The site does not present itself as a financial broker or make a licensing claim; consequently, the absence of a financial-services authorization is not anomalous for its stated business model.

- The homepage footer discloses the named condominium entity and CNPJ 20.755.190/0001-64.
- The contact area publishes a physical location at Av. República do Líbano, 251, Pina, Recife/PE, together with a local telephone number.
- The site's transport encryption uses a DV certificate issued by YR1, valid until October 2026.
- Third-party broker-context data contains no matching broker record for the site.

What to Verify Next

For material contractual commitments, event bookings, or condominium payments, the legal entity and payment instructions should be matched against the relevant contract, invoice, or independently held property-management records. Official contact channels can also be confirmed through existing tenancy documentation or an offline directory before initiating an unfamiliar payment request.

- The homepage offers a second-copy condominium billing function, making invoice-level beneficiary verification relevant to payment workflows.
- The event section advertises reservable corporate meeting and auditorium facilities, for which booking terms should identify the contracting party.
- The professional-directory function is presented as a locator for occupants across the complex’s towers and should not, by itself, be treated as an endorsement of listed professionals.

Summary Verdict

The website is a legitimate, established, and trustworthy corporate-property portal. Its consistent identity, mature operating footprint, clean reputation, stable behavior, and coherent service content support normal interaction, including account login and standard use. No contradictory risk signals were identified.

Infrastructure Integrity

The site resolves directly to a single DreamHost address in the United States and does not present a CDN or WAF layer. This straightforward hosting posture is consistent with a conventional corporate content site, although infrastructure alone is not evidence of organizational legitimacy.

- The hosting infrastructure serves the site from AS26347, operated by DREAMHOST-AS – New Dream Network, LLC, US.
- DNS resolves to a single server address, 69.163.185.93, with no detected edge-network or alternative origin candidates.

Closing Assessment

Prospective users may engage with the website normally while applying standard organizational controls for payments, contractual commitments, and account security.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rmtradecenter.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
