

Is robert-eaton.com legit? TrustSniffer's high-trust assessment: 100/100

robert-eaton.com

Verdict

100

OUT OF 100

HIGH TRUST

robert-eaton.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

A personal website for Robert Eaton, a nonfiction writer, containing biography, book overviews, writing samples, and contact email. The site appears informational and promotional for the author's work with no indication of financial schemes or interactive transactional features.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Robert Eaton

Nonfiction writer

What robert-eaton.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Robert Eaton's website is a personal nonfiction-writer portfolio presenting an autobiography, book overviews, writing samples, a blog, and a commonplace book. Its apparent purpose is to introduce and promote the author's work through informational content and direct contact, without financial services, investment solicitations, or transactional account features.

Scam/Impersonation Risk

No contradictions were observed across the site's identity presentation, content, behavior, and external indicators: there is no detected phishing, impersonation, malicious-content, or conflicting-identity signal. The homepage explicitly distinguishes this Robert Eaton from other people with the same name, which is an identity clarification rather than an impersonation indicator. A separate reputation signal consists of two reports concerning the hosting IP, but those reports were attributed to shared infrastructure, carried zero confidence, and were therefore not treated as evidence against this website. The site's static author content, absence of login or sensitive forms, and lack of financial solicitations are consistent with a low-risk personal website. The real-world operator identity nevertheless remains independently unverified.

EVIDENCE

- The homepage identifies the site as Robert Eaton's nonfiction-writer website and states that it contains an autobiography, book overviews, writing samples, and a commonplace book.
- The homepage has no login form, sensitive form, hidden form, or untrusted form destination.
- The hosting-IP record shows 2 abuse reports with confidence score 0, attributed to shared infrastructure rather than specifically to the website.
- Domain registration: 2013-03-03; age 13.47 years; registrar Bluehost Inc.; expiration 2027-03-03.

Regulatory Verification Notes

The website presents an individual author and informational publishing activity rather than a regulated financial, investment, or brokerage service. Its About and homepage material identifies Robert Eaton and includes a copyright statement, but that on-site presentation does not independently establish the operator's real-world identity. No licensing or registration claim is relevant to the apparent business model; any future commercial book-sales activity should still be assessed against ordinary merchant-disclosure expectations. The available technical evidence supports an established site: transport encryption is valid, and the content and behavior are stable and non-transactional.

EVIDENCE

- The homepage's title and biography content identify Robert Eaton as a nonfiction writer and describe the site as an author portfolio.
- The site's transport encryption uses a TLS certificate issued by YR1, with DV validation, valid to 2026-11-05T11:36:38+00:00.
- No financial-service, investment, brokerage, or other regulated offering is presented on the homepage or described in the site content.

What to Verify Next

Before any credential or payment interaction that may arise outside the currently observed site experience, an independent source should confirm the author or merchant identity, and any book-sale arrangement should be checked for clear return terms and payment-dispute protection. Official contact channels should be confirmed through an independent, offline or otherwise trusted route rather than relying solely on a newly supplied communication path.

EVIDENCE

- The observed site experience is informational and does not currently expose account, payment, or sensitive-data forms.
- The site's stated purpose is author and book promotion, so any later commercial interaction would represent a distinct transaction context requiring ordinary merchant checks.

Summary Verdict

The overall posture is high trust and low risk, and the available evidence is consistent with an established, apparently legitimate personal website. No scam or impersonation contradiction was identified, while

independent verification of the real-world operator remains incomplete.

Infrastructure Integrity

The site resolves to a single hosting location on AS31898, ORACLE-BMC-31898 – Oracle Corporation, US. No separate CDN vendor, WAF, edge-IP layer, or origin-candidate arrangement was identified; this is a straightforward hosting posture and does not by itself establish legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the observed risk posture; before credentials or payment details are provided in any future interaction, independent identity, merchant terms, and payment-protection checks should be completed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 2 reports on hosting IP 162.241.226.211 (Unified Layer, Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of robert-eaton.com.

- The request stayed on robert-eaton.com. It was not redirected to another domain. CLEAR
- Registration is published under Bluehost Inc.. CLEAR
- DNS for this domain is served by bluehost.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-03. NOTED
- The earliest public archive of this site is from 2013-07-04. CLEAR
- It is hosted on ORACLE-BMC-31898, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about robert-eaton.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
