Key findings

- Automated classification: Not Scam.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Rocketbank is a Russian-language digital-banking service presenting debit cards, cashback, savings accounts, deposits, credit, paid membership benefits, lifestyle services, and partner commerce, with banking services stated to be provided through Sovcombank.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there are no phishing, impersonation, blacklist, or malicious-content indicators. The homepage presents a coherent banking proposition with identifiable products, customer support, legal information, and a stated banking partner. Normal interaction, including account login and standard use, is appropriate.

EVIDENCE

- The homepage contains no reported fraud indicators, hidden forms, or suspicious login behavior.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no blacklist hit.
- The observed site behavior produced no external activity, wallet activity, or credential-exfiltration pattern.

Regulatory Verification Notes

The homepage identifies Sovcombank as the licensed banking provider and includes legal registration details and customer contact channels. The supplied evidence does not independently confirm the stated licensing relationship, so the disclosure should be treated as a documented on-page representation rather than a separate regulatory determination. This is a routine verification point for financial products, not an indication of impersonation or fraud.

EVIDENCE

- The homepage describes debit banking, savings and deposit products, credit, cashback, membership, and lifestyle services.
- Hosted on AS51115 (HLL-AS - HLL LLC, RU).
- TLS certificate issued by GlobalSign GCC R3 DV TLS CA 2020 (DV), valid to 2026-11-14.

What to Verify Next

Before relying on regulated financial services, confirm the stated Sovcombank relationship through the relevant official registry or an independently sourced bank channel. Review the applicable account, deposit, credit,

membership, and fee terms before entering into material commitments, and confirm customer-support channels through the official application or independently obtained contact details.

EVIDENCE

- Licensing verification should be matched against the banking-provider statement on the homepage.
- Product and fee review should be performed against the terms associated with each advertised service.
- Contact-channel confirmation should use an independently sourced official route.

Summary Verdict

The site presents a high-trust, legitimate, and established business posture supported by coherent content, clean reputation signals, identifiable legal and banking relationships, and normal observed behavior. No evidence supplied indicates scam activity, impersonation, or a contradictory identity.

Infrastructure Integrity

The site resolves directly to one likely origin address rather than a CDN- or WAF-fronted edge, with infrastructure hosted by HLL-AS - HLL LLC in Russia. This is a neutral architectural characteristic and does not undermine the overall legitimacy assessment.

Closing Assessment

Normal account access and standard use are appropriate, with ordinary financial-product review applied before significant commitments.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of rocketbank.ru.

- The request stayed on rocketbank.ru. It was not redirected to another domain. CLEAR
- It is hosted on HLL-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rocketbank.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
