

Is romeopirlanta.com safe? TrustSniffer's low-trust assessment: 40/100

romeopirlanta.com

Verdict

40

OUT OF 100

LOW TRUST

romeopirlanta.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Assessed 2026-09-23 by automated analysis. Classification confidence 55%.

What this site appears to be

A straightforward landing page in Turkish for submitting purchase offers for the domain romeopirlanta.com. It contains a single offer/contact form requesting name, email and an offer amount in USD. No login, no payment rails or regulatory claims are present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What romeopirlanta.com served when TrustSniffer captured it on 2026-09-23. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a Turkish-language landing page offering the domain romeopirlanta.com for sale. It presents a single purchase-offer form requesting a name, email address, and proposed price in USD, with the apparent purpose of collecting buyer interest and arranging a domain transfer.

Scam/Impersonation Risk

The site has a **cautionary risk posture** because external threat intelligence records multiple malicious detections and a confirmed blacklist listing, despite the landing page itself appearing technically simple and free of login, payment, wallet, or overt phishing functionality. The page content does not show brand impersonation or conflicting legal identities, so the principal concern is the external reputation contradiction rather than a demonstrated impersonation scheme. The historical record also creates a provenance inconsistency: archival records extend from 2011 to 2026, while current registration telemetry identifies a 2026 creation date; this should not be treated as proof of wrongdoing, but it weakens confidence in the continuity of the present operation.

EVIDENCE

- The homepage is a Turkish domain-sale landing page with one offer form requesting name, email, and a USD amount; no login or payment mechanism is present.
- External security assessments recorded 3 malicious detections and 1 suspicious detection, with a confirmed blacklist listing.
- Registration telemetry records creation on 2026-02-24 through Atak Domain, with an age of 0.58 years.
- Historical records contain 96 snapshots spanning 2011–2026, covering 16 years of tracking.

Regulatory Verification Notes

The website presents a private domain-sale transaction rather than a regulated financial service and makes no licensing or regulatory claim. Its visible content does not identify a corporate seller, legal entity, or registration number; the footer only identifies the domain and a 2026 copyright notice. Because the operator identity is not independently verified, the site should not be treated as an established legal counterparty solely on the basis of its presentation. The transaction model also places importance on confirming who controls the domain and who would receive any funds before proceeding.

EVIDENCE

- The homepage describes the service as a purchase-offer process for romeopirlanta.com and does not publish a company name or regulatory authorization.
- The offer form collects contact details and a proposed USD purchase price but does not identify the contracting seller.
- The domain is hosted on AS207279, identified as MARKAHOST-TELEKOMUNIKASYON-LIMITED-SIRKETI – Markahost Telekomunikasyon Ve Ticaret Limited Sirketi, TR.
- The site uses a DV TLS certificate issued by YR1, valid until 2026-11-24.

What to Verify Next

Before any transaction, the prospective counterparty should independently confirm domain control through the registrar or an established escrow provider, validate the seller's legal identity and authority to transfer the domain, and use payment protection that preserves recourse if the transfer fails. Any licensing or registration representation should be checked against the relevant official registry, although the site does not itself claim to provide a regulated service. Contact details should be corroborated through an independent channel rather than relying solely on the landing-page form.

EVIDENCE

- The homepage provides only a domain-sale form and does not establish the seller's legal identity.
- The proposed transaction involves submission of personal contact information and a USD offer.
- The site's stated purpose is a domain sale, making registrar-level control and escrow confirmation directly relevant.

Summary Verdict

The overall posture is low trust with elevated risk for sensitive interaction. The available evidence supports treating the website as an unverified transaction point rather than as a dependable or independently established counterparty.

Infrastructure Integrity

The site resolves directly to one identified hosting address rather than a protected CDN edge, with no CDN or WAF detected. This infrastructure provides limited defensive separation between the public service and its hosting environment and does not offset the external reputation concerns.

EVIDENCE

- Hosted on AS207279, MARKAHOST-TELEKOMUNIKASYON-LIMITED-SIRKETI, with the hosting location recorded as GB.
- One likely origin IP was identified and no CDN edge IPs or CDN vendor were detected.
- TLS validation is domain-validated (DV), issued by YR1, with validity through 2026-11-24.

Closing Assessment

The appropriate course is to limit interaction to non-sensitive review until domain control, seller identity, and payment protections have been independently confirmed; personal information or funds should not be committed on the basis of the landing page alone.

Written analysis generated 2026-09-23 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about romeopirlanta.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
