

Is rongbachkim686.com a scam? TrustSniffer's high-risk assessment: 5/100

rongbachkim686.com

Verdict

5

OUT OF 100

CRITICAL RISK

rongbachkim686.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Vietnamese-language site focused on lottery (xổ số) predictions and tips for the Miền Bắc region. Provides suggested number combinations, prediction lists, and related articles (dream interpretation, betting strategies). Contact email is visible; no structured monetization, registration, or transaction flows are present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What rongbachkim686.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is a Vietnamese-language lottery-prediction and gambling-advice publication focused on northern Vietnamese lottery results. It presents suggested number combinations, “soi cầu” analysis, betting strategies, dream-related number interpretations, and daily prediction content, with no visible account, payment, or transaction workflow.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk** because external threat intelligence recorded six malicious detections and a confirmed blacklist hit. This is materially more significant than the page-level review, which found no login form, hidden sensitive form, or overt phishing interface. No conflicting legal identities or direct brand impersonation were observed, so the principal contradiction is the external malicious and blacklist reputation rather than an on-page identity conflict. The site's lottery advice—including number combinations, “nuôi lô,” “lô tiên,” and claims that users can obtain numbers from its “experts”—also creates a gambling-related exposure, although no direct transaction mechanism was identified. Evidence:

- The homepage publishes northern-region lottery predictions, suggested number combinations, betting methods, and related gambling advice.

- External reputation checks recorded 6 malicious detections and a confirmed blacklist hit.
- The homepage contains no login form, hidden sensitive form, or structured payment flow.
- The domain was registered on 2017-11-15 and is approximately 8.77 years old, which establishes registration continuity but does not offset the external threat findings.
- Historical records contain 53 archive snapshots spanning 2018–2025, covering 8 tracked years.

Regulatory Verification Notes

The available site content does not state a licensing authority or registration number for its gambling-related publication, and the operator's real-world identity remains independently unverified. This is a regulatory and transparency verification gap, not by itself proof of fraud; however, in combination with the external reputation findings, it prevents the site from being treated as an established regulated service. The absence of a matching third-party broker record provides no positive licensing determination and should not be interpreted as regulatory clearance. Evidence:

- The homepage identifies the activity as lottery prediction and gambling advice but does not present a license authority or license number.
- The published business model is informational content, with possible advertising, affiliate, or donation monetization but no stated operator or formal service terms in the supplied page content.
- The site is hosted on AS22612, NAMECHEAP-NET (Namecheap, Inc., US).
- Transport encryption uses a DV certificate issued by Sectigo Public Server Authentication CA DV R36, valid through 2027-01-07.

What to Verify Next

Any prospective engagement should first establish the operator's legal identity and confirm whether the relevant gambling or lottery authority recognizes the activity. Independent confirmation of official contact channels, ownership, and any proposed payment or referral arrangement should be completed before sensitive information, credentials, or funds are involved. The external reputation alert should also be resolved through an independent security review rather than discounted because the site is informational. Evidence:

- The homepage provides content and contact functionality but no structured registration, account, or transaction process.
- Observed browser activity included 2 non-whitelisted external posts and 26 console errors across 2 successful evaluation runs.
- The site's stated content model does not establish a regulated operator, payment processor, or accountable commercial entity.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The site may function as a public content page, but the available evidence does not support treating it as a trusted destination for credentials, account access, financial activity, or other consequential engagement.

Infrastructure Integrity

The site resolves to a direct hosting environment operated by Namecheap, Inc. in the United States, using AS22612 and no detected CDN or WAF edge layer; one likely origin IP was identified. The presence of mainstream TLS protection is a limited transport-control benefit, but it does not validate the operator or overcome the external reputation risk. Evidence:

- Hosted on AS22612 (NAMECHEAP-NET - Namecheap, Inc., US).
- The resolved infrastructure contains 1 unique IP, with 0 edge IPs and 1 likely origin IP.
- TLS validation level is DV; issuer is Sectigo Public Server Authentication CA DV R36; certificate expiry is 2027-01-07T23:59:59+00:00.

Closing Assessment

The appropriate institutional posture is to restrict activity to non-sensitive observation while withholding credentials, account access, payment details, and funds until independent identity, regulatory status, and security concerns have been satisfactorily resolved.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of rongbachkim686.com.

- The request stayed on rongbachkim686.com. It was not redirected to another domain. CLEAR
- Registration is published under ENOM, INC.. CLEAR
- DNS for this domain is served by namecheaphosting.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-15. NOTED
- The earliest public archive of this site is from 2018-08-04. CLEAR
- It is hosted on NAMECHEAP-NET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rongbachkim686.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
