Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the official online presence of IIE Rosebank International, a South African private higher-education provider that presents campus-based and online study options, admissions and registration services, fee payment, student support, and institutional information.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or other scam-related contradictions were observed. The institutional identity is supported by a long-established domain, sustained historical use associated with Rosebank College, and a clean external reputation across the evaluated threat-intelligence sources. The callback form has no untrusted destination, while behavioral testing found no hidden forms, credential forwarding, cloaking, clipboard interference, or wallet-related activity.

- The domain registration record identifies ADVTECH (The Independent Institute of Education (Pty) Ltd) as the organization and Lexsynergy Limited as the registrar; registered 19 February 2001 (~25.47 years old), with expiry on 19 February 2027.
- The domain archive contains 306 snapshots spanning 28 September 2002–6 June 2026 (25 years tracked), with no evidenced repurposing or fundamental change of business category.
- The homepage consistently identifies the site as an educational institution and links to The Independent Institute of Education's website.
- Reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing result, no abuse reports, and no matching threat signatures.

Regulatory Verification Notes

The homepage provides a coherent institutional identity and dedicated pathways for accreditation, management, policies, international students, fees, and campus contacts. It also states that the operating company and government registration are identified, although the supplied page evidence does not reproduce the underlying registration particulars or accreditation entries. This is a minor documentary-verification matter rather than a legitimacy concern. No relevant broker-profile match was found, but that result has no bearing on an education provider's legal standing.

- The homepage navigation includes dedicated "Accreditation," "Management," and institutional-policy pathways.
- The homepage presents campus contact information for Bloemfontein, Braamfontein, Cape Town, Durban, Nelson Mandela Bay, Mbombela, Polokwane, and Pretoria, together with a separate online-study channel.

- The homepage provides admissions, application, registration, international-student, fee-payment, and student-account functions within the same institutional presentation.
- The site's transport encryption uses a WE1-issued domain-validated TLS certificate, valid to 29 October 2026.

What to Verify Next

For enrolment or material fee commitments, the relevant qualification and delivery mode should be matched against the institution's published accreditation information, and the applicable tuition, refund, cancellation, and student-protection terms should be retained. Payment instructions and material account changes should be confirmed through the published institutional channels.

- The homepage offers degrees, diplomas, higher certificates, and postgraduate qualifications across contact, blended, and online study modes.
- The homepage provides separate application, registration, fee-payment, and student-account-query pathways.
- The site publishes multiple campus telephone contacts and centralized customer-service channels that can support independent confirmation.

Summary Verdict

The website is a legitimate, established, and trustworthy institutional presence. Its coherent organizational identity, extensive operating content, long provenance, clean reputation, and benign observed behavior converge strongly in support of normal use, including account login and standard transactions.

Infrastructure Integrity

The site is served from AS13335 (Cloudflare, Inc., US) through Cloudflare CDN/WAF infrastructure. The observed address, 104.19.208.28, is an edge endpoint; shielding the origin reduces direct exposure but is a protective control rather than independent proof of legitimacy.

Closing Assessment

Normal interaction is appropriate; prospective students should follow ordinary enrolment diligence and retain records of material applications, terms, and payments.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of rosebankcollege.co.za.

- The request stayed on rosebankcollege.co.za. It was not redirected to another domain. CLEAR
- Registration is published under Lexsynergy Limited. CLEAR
- DNS for this domain is served by co.za, across 3 name servers. NOTED
- The registration is paid up to 2027-02-19. NOTED
- The earliest public archive of this site is from 2002-09-28. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rosebankcollege.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
