

Is roseltorg.ru legit? TrustSniffer's high-trust assessment: 100/100

roseltorg.ru

Verdict

100

OUT OF 100

HIGH TRUST

roseltorg.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-16 by automated analysis. Classification confidence 55%.

What this site appears to be

Official-appearing Russian electronic trading platform landing page describing registration, procurement sections (44-FZ, 223-FZ, 178-FZ), corporate partner sections, services offered (electronic signature, guarantees, registration help), contact info, and links to specialized subsections. Content emphasizes service offerings and onboarding for suppliers and organizers.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://www.roseltorg.ru/>

What roseltorg.ru served when TrustSniffer captured it on 2026-08-16. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

roseltorg.ru is a Russian electronic trading and procurement marketplace that presents registration and accreditation for suppliers, buyers, organizers, and sellers, alongside government, state-owned, commercial procurement, and asset-sale services. Its apparent business model combines platform participation fees with paid registration assistance, electronic-signature and guarantee services, and corporate procurement partnerships.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing, impersonation, malicious-site, or confirmed blacklist indicators. The site's substantive procurement content, clear registration pathways, contact information, and specialized marketplace sections are consistent with an established commercial platform. Some captured interactions produced substantial page updates and limited non-whitelisted network activity, but this was not accompanied by hidden forms, external password collection, wallet connection, clipboard manipulation, or cloaking; the behavior therefore does not establish an impersonation or scam pattern.

EVIDENCE

- The domain was registered on 2007-07-24 and is 19.08 years old; registrar: RU-CENTER-RU.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no malicious search-safety result.
- The homepage contains one contact or registration-intent form, with no login form, hidden form, or password submission to an untrusted destination detected.

Regulatory Verification Notes

The site's content is consistent with an electronic procurement marketplace and specifically references procurement sections associated with 44-FZ, 223-FZ, and 178-FZ, as well as electronic signatures, guarantees, registration assistance, and government and commercial asset auctions. The supplied pages do not state a licensing authority or license number, so the regulatory status and the exact legal operator should be confirmed independently; this is a disclosure and verification matter, not evidence of fraud. Available legitimacy signals converge positively: the site has a long-established registration, a strong global traffic footprint, clean external reputation coverage, and transport encryption using an organization-validated certificate. The real-world operator identity remains unverified on an independent basis.

EVIDENCE

- The domain's traffic measurement places it at rank 21170 and within the top 1 million websites globally.
- Hosting is provided by EETP - EETP, JSC, RU on AS59673.
- TLS is organization-validated and issued by GlobalSign RSA OV SSL CA 2018 for AO EETP, valid to 2027-01-16T06:47:01+00:00.
- The homepage identifies procurement activity under 44-FZ, 223-FZ, and 178-FZ and advertises electronic-signature, guarantee, and registration services.

What to Verify Next

Before credential or payment interactions, an independent check should connect the domain and the contracting entity to official procurement or corporate records, and any applicable authorization should be confirmed with the relevant registry. The terms governing platform participation, service fees, guarantees, refunds, and dispute handling should be reviewed, with payment-protection controls confirmed before funds are transferred. Official contact channels should also be cross-checked through an independent source rather than relying solely on contact details presented on the site.

EVIDENCE

- The homepage provides separate onboarding routes for organizers and suppliers or buyers.
- The site links to specialized procurement and asset-trading sections, including a government procurement reference point.
- The captured registration surface is an intent or contact form rather than a password-collection form.

Summary Verdict

The overall posture is high trust and low risk, and the available evidence is consistent with an established, apparently legitimate website rather than a scam or impersonation site. This conclusion supports ordinary business consideration, while the operator’s real-world identity remains independently unverified.

Infrastructure Integrity

The site resolves directly to infrastructure operated by EETP - EETP, JSC in Russia, with no CDN or WAF identified and likely origin infrastructure exposed. Direct hosting is not itself a legitimacy concern, but it provides less intermediary shielding than a mainstream edge-delivery configuration.

EVIDENCE

- Infrastructure resolution identified 2 unique IP addresses, including 2 likely origin candidates, with 0 edge IPs.
- No CDN vendor was detected; the infrastructure registry is RIPE NCC.

Closing Assessment

Routine browsing and ordinary platform use are proportionate to the assessed posture; credentials and payments should nevertheless follow independent entity, authorization, contract, and payment-protection checks before commitment.

Written analysis generated 2026-08-16 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of roseltorg.ru.

- The request stayed on roseltorg.ru. It was not redirected to another domain. CLEAR
- Registration is published under RU-CENTER-RU. CLEAR
- DNS for this domain is served by ru., across 7 name servers. NOTED
- The registration is paid up to 2027-07-24. NOTED
- It is hosted on EETP, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [roseltorg.ru](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
