Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

An Arabic-language business website for “شركة رؤية” presents itself as a supplier and distributor of Arabic and foreign books for libraries and educational and cultural institutions, offering modern-book distribution, custom orders, a catalogue, testimonials, and a contact/order form.

Scam/Impersonation Risk

The site’s stated commercial purpose is ordinary, and the reviewed page contains no login form, hidden form, or detected brand-impersonation indicator. However, this benign presentation is outweighed by material external threat signals: the domain has been **blacklisted**, 11 malicious detections were recorded, and Fortinet and Sophos identified a threat. The available evidence therefore supports a clearly elevated risk for credential, payment, and other sensitive interactions, even though the page itself does not display overt scam language or investment-related claims. No conflicting legal-entity names were observed across the reviewed site content.

EVIDENCE

- External reputation assessment recorded 11 malicious detections and a confirmed blacklist status for the domain.
- Fortinet and Sophos were among the vendors producing threat detections.
- The homepage and contact/order form review found no login form, hidden form, or brand-impersonation indicator.

Regulatory Verification Notes

The website presents a business name, service descriptions, testimonials, a telephone number, and a contact form, but the reviewed content does not establish an independently verified real-world operator. No licensing or registration number is claimed on the site; for a book-supply business this is primarily a legal-identity and disclosure item requiring confirmation rather than standalone evidence of fraud. The domain is registered through Hosting Concepts B.V. d/b/a Registrar.eu, while the registrant information uses a privacy service as an administrative arrangement. No matching broker record was identified in the available third-party reputational context.

EVIDENCE

- Domain registered on 2021-04-06 and recorded as approximately 5.38 years old; expiry is 2027-04-06.
- Web archives contain 50 snapshots spanning 2021–2025, with 5 years tracked.
- Served from AS47583, identified as AS-HOSTINGER – Hostinger International Limited, CY.
- TLS certificate issued by YE2 at DV validation level, valid to 2026-10-17, with 56 days remaining.

What to Verify Next

Before any commercial engagement, the counterparty should independently confirm the legal entity behind “شركة رؤية”, its physical business details, and the authority of the person accepting orders. Any applicable commercial registration, supplier authorization, invoicing details, refund terms, and payment-protection arrangements should be checked through official or independently sourced channels rather than relying solely on the website. Contact details should also be validated through an offline or separately established business channel.

EVIDENCE

- The homepage identifies the business as “شركة رؤية” and describes supply services for libraries and educational and cultural institutions.
- The site provides an order/contact form and published contact channels, but the reviewed material does not independently verify the operating entity.
- The site’s commercial pages describe custom-order fulfilment, making counterparty and payment-process verification relevant before an order is accepted.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. The professional appearance and conventional business model do not offset the confirmed external threat detections and blacklist status, while the real-world operator remains unverified.

Infrastructure Integrity

The site resolves directly to infrastructure associated with Hostinger International Limited, using AS47583 and a Ukrainian network location. No CDN or edge-IP layer was identified; four addresses were assessed as likely origin addresses. This infrastructure provides basic hosting continuity but does not independently establish legitimacy or materially offset the external reputation risk.

Closing Assessment

Limit activity to passive viewing unless the operator, transaction process, and payment protections have been independently validated; credentials, financial details, and financial transactions should not be submitted through the site.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01

Governance Risk
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN
- 02

Sensitive Interaction Risk
 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

About this assessment

A trust score summarises the evidence TrustSniffer could collect about royavi.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
