

Is rtdvrenthe.nl legit? TrustSniffer's high-trust assessment: 91/100

rtdvrenthe.nl

Verdict

91

OUT OF 100

HIGH TRUST

rtdvrenthe.nl appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-04 by automated analysis. Classification confidence 55%.

What this site appears to be

Dutch-language homepage of RTV Drenthe, an established regional broadcaster covering local news, sports, municipalities, public-safety incidents, cultural topics, videos, and regional dossiers. It provides organizational and contact links and presents a detailed cookie-consent interface without requesting login, payment, or other sensitive information.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

RTV Drenthe is a Dutch regional public-service media website presenting local news, sports, public-safety reporting, weather information, video, audio, and regional dossiers, supported by advertising-related activity and consent-based personalization.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or other scam indicators were observed. The homepage is consistent with an established regional broadcaster: it contains substantial editorial material, does not solicit payment or cryptocurrency activity, and presents no login form, hidden form, or sensitive-data collection mechanism. Its long-established domain, significant traffic footprint, and clean standing across the evaluated external threat sources provide convergent evidence of legitimacy.

- The homepage is a content-rich regional news service covering municipalities, community events, public safety, weather, local sports, and audiovisual journalism.
- Homepage behavior showed no login form, sensitive form, hidden form, cloaking, clipboard interference, wallet integration, or suspicious inline scripts.
- The domain was registered in 1997 and is approximately 29.39 years old.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, no reported abuse, and a global traffic rank of 51,961.

Regulatory Verification Notes

The site presents itself as a regional public-service broadcaster rather than a financial, investment, payment, or brokerage service; consequently, the absence of a financial-services licence claim is consistent with its stated activity and is not a legitimacy concern. Available page analysis identifies organizational, contact, privacy, and editorial-policy content, supporting an accountable publishing operation. The site also provides granular consent controls for personalization and third-party commercial content.

- The homepage identifies the service as “Regionaal nieuws en sport - RTV Drenthe” and contains organizational and contact navigation.
- The homepage provides consent choices covering cookies, personalization, and third-party content.
- The site is served from AS25182, operated by Stichting Nederlandse Publieke Omroep in the Netherlands.
- Transport encryption uses a YE2-issued domain-validated TLS certificate, valid until 2026-09-04.

What to Verify Next

Routine institutional due diligence may confirm that organizational and editorial-policy details remain current, record the applicable privacy and cookie notices, and confirm official contact channels through published organizational materials. These are normal governance checks for a media publisher rather than responses to detected fraud.

- The homepage exposes links to organizational, contact, privacy, and editorial-policy information suitable for documentary review.
- The observed page requests no payment information, account credentials, or other sensitive form input.
- The advertising and personalization model involves third-party commercial content, making the published consent terms relevant to privacy review.

Summary Verdict

RTV Drenthe is a legitimate, established, and trustworthy regional media website. Its mature identity, substantive editorial operation, clean external reputation, meaningful public usage, and benign observed behavior converge strongly, with no contradictory risk signals. Normal interaction, including account login and standard use where offered, is appropriate.

Infrastructure Integrity

The site resolves directly to infrastructure operated by Stichting Nederlandse Publieke Omroep rather than using a CDN or WAF intermediary; one likely origin address was observed in the Netherlands. This is a coherent institutional hosting posture, although infrastructure alignment remains a mitigating technical signal rather than independent proof of legitimacy.

Closing Assessment

Prospective users and institutional counterparties may engage with the website normally, subject to ordinary privacy, consent, and organizational due-diligence procedures.

Written analysis generated 2026-08-04 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of rtdrenthe.nl.

- The request stayed on rtdvrenthe.nl. It was not redirected to another domain. CLEAR
- Registration is published under NPO. CLEAR
- DNS for this domain is served by npodns.nl, across 4 name servers. NOTED
- It is hosted on PUBLIEKE-OMROEP-AS, from a server in NL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rtdvrenthe.nl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
