

Is rtvslo.si legit? TrustSniffer's high-trust assessment: 90/100

rtvslo.si

Verdict

90

OUT OF 100

HIGH TRUST

rtvslo.si appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 75%.

What this site appears to be

RTV SLO / MMC news portal page in Slovenian: news headlines and sections (Slovenija, Svet, Šport, Kultura, etc.), weather, multimedia, and a login form for user personalization. Typical public-broadcaster structure with editorial content and ads.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 1996.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

RTV SLO is an established Slovenian public-broadcasting and news portal presenting national and international news, sports, culture, weather, multimedia, advertising, and user-account features for personalization, comments, notifications, and newsletters.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent public-media structure with editorial sections, broadcasting services, multimedia content, and ordinary account functionality rather than financial, investment, or cryptocurrency services. The login form is consistent with the stated personalization features, and no phishing, brand-impersonation, malicious-content, or external reputation indicators were identified. The available historical record also supports continuity of the same broad site category rather than suspicious repurposing.

EVIDENCE

- The homepage provides Slovenian, international, sports, culture, weather, and multimedia sections, together with RTV services and account functions.
- The domain was registered on 1995-06-28 and is 31.14 years old; registrar: Domenca.
- The archive contains 5,000 snapshots spanning 1996–2021, with 26 years tracked and a first snapshot on 1996-12-28.

Regulatory Verification Notes

The site's apparent business model is public broadcasting and advertising, with the primary service being informational content rather than a regulated financial product. Its navigation includes "O RTV" and "Kontakti in informacije," providing institution- and contact-oriented sections; however, the supplied evidence does not independently verify the real-world operator identity, and no licensing claim or license number was identified. This is a limited disclosure point relevant to institutional due diligence, not evidence of deceptive conduct. The absence of a matched broker signal and the clean external reputation context are consistent with the site's established-media presentation, but do not constitute a legal or regulatory determination.

EVIDENCE

- The homepage identifies the site as “RTV SLO” and exposes “O RTV,” “Kdo smo,” “RTV-prispevek,” “Za medije,” and “Kontakti in informacije” navigation.
- Hosted on AS47917, RTVSLO-ASN – RTV Slovenija, SI.
- TLS certificate issued by Thawte TLS RSA CA G1 with OV validation for RTV Slovenija, valid to 2026-08-26.

What to Verify Next

Before credential use, an enterprise or regulated user should independently confirm that the intended account service is reached through the institution's established official communications and should review the applicable account, privacy, and user-content terms. Any future commercial interaction should be assessed separately through ordinary merchant-identity, return-policy, and payment-protection checks. Account credentials should remain unique to this service and should not be reused elsewhere.

EVIDENCE

- The homepage contains one login form with username, password, registration, and password-recovery functions.
- The homepage links to account personalization, comments, notifications, newsletters, accessibility settings, and related user features.
- The site navigation provides dedicated institutional and contact sections suitable for independent confirmation of official channels.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website supporting a high-trust, low-risk posture. The site's identity is not independently verified to the standard required for treating the operator as conclusively proven, but no contradictory signals were observed.

Infrastructure Integrity

The site resolves directly to infrastructure associated with RTV Slovenija in Slovenia, with no detected CDN or WAF edge layer and two likely origin addresses. This direct hosting arrangement is a neutral architectural characteristic; the identified institutional hosting context and valid organization-validated transport encryption provide useful mitigating context without independently proving legitimacy.

Closing Assessment

Normal browsing is proportionate to the assessed posture; before account or any future payment interaction, ordinary independent checks of the official service identity and applicable user protections should be completed.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of rtvslo.si.

- The request stayed on rtvslo.si. It was not redirected to another domain. CLEAR
- Registration is published under Domenca. CLEAR
- DNS for this domain is served by 67.51), across 4 name servers. NOTED
- The registration is paid up to 2029-06-06. CLEAR
- The earliest public archive of this site is from 1996-12-28. CLEAR
- It is hosted on RTVSLO-ASN, from a server in SI. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rtvslo.si at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a

legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
