

Is rupayangroup.com legit? TrustSniffer's high-trust assessment: 100/100

rupayangroup.com

Verdict

100

OUT OF 100

HIGH TRUST

rupayangroup.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Rupayan Group corporate site with company description, list of concerns/subsidiaries, office addresses and contact emails/phones. Includes links and repeated showcase items. No login or payment flows visible.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

BACKGROUND

What rupayangroup.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Rupayan Group is a Bangladesh-based corporate group website presenting company information, management, missions, subsidiaries or “concerns,” projects, office locations, and contact channels. Its apparent business model is a diversified holding and operating group spanning real estate, construction, media, properties, and related corporate activities, with corporate information and contact engagement as the primary visitor actions.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing or impersonation indicators, no confirmed malicious or blacklist signal, and no suspicious login, payment, wallet-connection, or credential-capture flow. The site’s corporate presentation is consistent with its stated group-company purpose, while unrelated casino-related text and external references visible in the captured page indicate a content-quality issue that does not, on the supplied evidence, establish an impersonation or scam pattern. The overall posture therefore remains that of an apparently legitimate, established website, with the real-world operator identity not independently verified.

EVIDENCE

- The homepage presents a corporate/group navigation structure covering “About Us,” “Our Management,” “Mission,” “Vision,” “Our Concern,” “Showcase,” and “Contact Us,” with no login form or payment flow detected.
- The domain was registered on 2006-09-27 and is approximately 19.91 years old through the recorded registration period; registrar: Dynadot Inc.
- Archive records show 184 snapshots from 2007 through 2026, covering 20 years.
- Available external reputation checks returned no malicious, phishing, or blacklist indication; coverage was partial.

Regulatory Verification Notes

The About, management, concerns, and contact content supports an apparent corporate identity and describes a diversified Bangladesh-based group, but the supplied pages do not present a licensing or registration number for a regulated financial service. That is a disclosure and verification matter rather than evidence of a scam, particularly because the observed site model is corporate and property-oriented rather than an online financial-services platform. No independent confirmation connects the website to a specific real-world legal operator, so the identity assessment should remain qualified. The absence of a broker-dataset match is a limited contextual reputational signal and is not a licensing determination.

EVIDENCE

- The homepage and corporate-information pages describe Rupayan Group, its concerns or subsidiaries, office addresses, and management-related content.
- The site is hosted on AS38744, AONB-AS-AP – AlwaysOn Network Bangladesh Ltd, BD.
- Transport encryption uses a DV certificate issued by Sectigo Public Server Authentication CA DV R36, valid through 2026-12-04.
- No regulated-service license claim or license number is supplied in the analysed business-model and page-content records.

What to Verify Next

Before any credential or payment interaction, an independent check should confirm the relevant legal entity, office details, and official contact channels through an offline or independently sourced route. If a proposed engagement concerns a regulated subsidiary or financial activity rather than ordinary corporate contact, the applicable national registry should be checked for the specific entity and service. Any commercial transaction should also be covered by ordinary contractual, return-policy, and payment-protection checks.

EVIDENCE

- The Contact page supplies office addresses, telephone numbers, and email channels suitable for independent cross-checking.
- The About Us, Our Management, and Our Concern pages provide the identity and subsidiary information against which an external registry search can be compared.
- The visible site interaction is limited to a contact form, with no sensitive form destination or external password submission detected.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate corporate website and supports a high-trust, low-risk posture for ordinary browsing and corporate engagement. The classification is strong, but it does not independently prove the real-world operator’s identity.

Infrastructure Integrity

The site resolves to a single directly hosted address rather than a detected CDN or WAF edge, with no protective CDN layer identified. This provides less intermediary shielding than an edge-protected deployment, but the observed infrastructure presented no confirmed abuse pattern and the site’s transport encryption is valid.

Closing Assessment

Ordinary engagement is proportionate, subject to independent merchant or corporate-identity, contractual, and payment-protection checks before credentials or payments are submitted.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of rupayangroup.com.

- The request stayed on rupayangroup.com. It was not redirected to another domain. CLEAR
- Registration is published under Dynadot Inc. CLEAR
- DNS for this domain is served by alwaysonbd.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-27. NOTED

- The earliest public archive of this site is from 2007-07-01. CLEAR
- It is hosted on AONB-AS-AP, from a server in BD. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rupayangroup.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
