

Is rutoken.ru legit? TrustSniffer's high-trust assessment: 100/100

rutoken.ru

Verdict

100

OUT OF 100

HIGH TRUST

rutoken.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 75%.

What this site appears to be

Official-looking Russian corporate homepage for Rutoken, a longstanding authentication and information-security product line operated by Company Aktiv. It presents hardware and software products, enterprise security solutions, certifications, downloads, documentation, ordering information, company details, news, events, partners, a Moscow address, and a telephone number.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the corporate product portal for Rutoken, an authentication and information-security portfolio operated by Company Aktiv, presenting hardware tokens, electronic-signature and cryptographic-key storage products, multifactor-authentication solutions, enterprise integration services, software downloads, technical documentation, support, and purchasing information.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or other substantive fraud signals were observed. The site's consistent corporate identity, long operational history, established traffic footprint, and clean external reputation converge strongly in support of legitimacy. Interactive testing found no hidden or sensitive forms, credential redirection, cloaking, clipboard manipulation, cryptocurrency-wallet behavior, or suspicious inline scripts.

- The homepage identifies Company Aktiv as the operator and provides corporate information, partner material, a Moscow address, and a telephone number.
- The domain was registered on 20 June 2001 and is approximately 25.13 years old; the registrar is RU-CENTER-RU, with registration recorded through 20 June 2027.
- Web archives contain 379 snapshots spanning 21 October 2001 to 24 July 2026, covering 26 tracked years without detected suspicious repurposing.
- External reputation checks recorded zero malicious and zero suspicious detections, no reported blacklist or phishing hit, and a global traffic rank of 58,686.

Regulatory Verification Notes

Rutoken presents itself as a cybersecurity-product vendor rather than a financial intermediary, broker, or investment service. The homepage references product and compatibility certifications, but the supplied evidence does not establish the specific certificates, issuing authorities, or scope applicable to an intended deployment. This is a procurement and compliance-validation matter, not evidence of deception; no conflicting legal-entity names or adverse broker-reputation match were identified.

- The homepage contains dedicated areas for certified products and compatibility certificates alongside enterprise deployment and integration material.
- The homepage describes applications including electronic employee credentials, secure remote work, two-factor authentication, multifactor authentication, PKI, and integration with information-security products.

- The reviewed corporate material consistently attributes the product portfolio to Company Aktiv.
- The third-party broker-intelligence dataset returned no matching broker profile or reputational warning.

What to Verify Next

Enterprise purchasers should match each proposed Rutoken model to the certification, cryptographic standard, operating-system compatibility, and lifecycle requirements of the intended environment. Procurement teams should obtain current certificate documents and supply terms through the official ordering or partner channel, while security teams should validate driver and software-package integrity through the published download and documentation resources.

- The homepage provides separate support, download, release-history, knowledge-base, developer-kit, and documentation resources suitable for technical validation.
- The ordering area provides pricing, demonstration-kit, branding, delivery-condition, and authorized-purchase pathways.
- The product catalogue distinguishes multiple device, smart-card, MFA, OTP, TLS, PKI, embedded-cryptomodule, and platform-specific offerings, making model-specific suitability review necessary.

Summary Verdict

The website is a legitimate, established, and trustworthy corporate security-product portal. Its coherent identity, mature operating history, substantive technical content, clean reputation, and benign observed behavior support normal interaction, including account login and standard use.

Infrastructure Integrity

The site resolves directly to a likely origin address rather than operating behind a detected CDN or WAF. Its identified Russian hosting and valid transport encryption provide a coherent, conventional delivery posture; these technical controls mitigate connection and hosting risk but are not treated independently as proof of corporate legitimacy.

- The hosting infrastructure serves the site from AS51115, operated by HLL-AS – HLL LLC in Russia, at the observed address 78.155.198.227.
- The site uses a domain-validated TLS certificate issued by YE1, valid until 28 October 2026.
- Resolution identified one likely origin address and no CDN edge address.

Closing Assessment

Normal corporate, support, download, ordering, and account interactions are appropriate, subject to standard enterprise procurement and software-integrity controls.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	50%
No on-site identity signals detected	
Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.	
What TrustSniffer observed	
First-party facts recorded during the assessment of rutoken.ru.	
- The request stayed on rutoken.ru. It was not redirected to another domain. CLEAR - Registration is published under RU-CENTER-RU. CLEAR - DNS for this domain is served by ru., across 4 name servers. NOTED - The registration is paid up to 2027-06-20. NOTED - The earliest public archive of this site is from 2001-10-21. CLEAR - It is hosted on HLL-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about rutoken.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
