## Full analysis

### Security Alert

Kaspersky flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website is an informational business-card page for R&M Producciones, presenting local event-production and related services including audio and lighting, corporate events, staging, special effects, LED screens, marketing stands, artist representation, and real-estate brokerage. Its apparent purpose is to generate service inquiries and contract-based business rather than provide an interactive financial or account-based service.

### Scam/Impersonation Risk

The site's page-level content is a simple services presentation with no login form, sensitive-data form, wallet connection, or visible financial solicitation, and no brand impersonation or conflicting legal identity was identified in the supplied content. However, this benign presentation is outweighed by confirmed external threat detections and a confirmed blacklist status from multiple external sources, including six malicious detections in the evaluated results. The resulting concern is not based on the advertised event-production model itself, but on the external security reputation attached to the domain. The operator's real-world identity also remains

independently unverified, so the on-page business presentation should not be treated as proof of the responsible entity.

#### EVIDENCE

- The homepage is titled “R&M Producciones - Tarjeta de Presentación” and lists event-production, artist-representation, and real-estate services without login or sensitive-input forms.
- External reputation assessment recorded 6 malicious detections from 11 effective detections and a confirmed blacklist status.
- Domain registration records show creation on 2009-01-26 through OnlineNIC, Inc., with an age of 17.58 years.
- Historical records show 43 archive snapshots spanning 2011–2025, with 15 years tracked.

### Regulatory Verification Notes

The available material is a contact-card homepage rather than a substantive legal, corporate, or regulatory disclosure. It does not present a licensing authority, registration number, or independently verifiable legal-entity information; this is a transparency gap requiring verification before any commercial engagement, not standalone proof of fraud. The listed activities appear to involve ordinary service contracts and commissions, but the site does not establish which entity is contractually responsible for those services. No matching third-party broker profile was identified, which provides no licensing conclusion either way.

#### EVIDENCE

- The homepage provides a service list and contact-oriented presentation but no visible legal-entity, licensing, or registration disclosure.
- The stated business model covers event production, artist representation, and real-estate brokerage, creating distinct contractual and regulatory questions for each service category.
- The available third-party broker-context check returned no match and therefore does not verify authorization or regulatory standing.

### What to Verify Next

Before contracting, the prospective counterparty should confirm the responsible legal entity, corporate registration, and any authorization relevant to artist representation or real-estate brokerage through the applicable official registries. Contact details should be corroborated through an independently obtained business record or offline channel, and proposed invoices, contracts, payment destinations, and ownership of the linked web presence should be checked for consistency before funds or sensitive documents are exchanged. Any external security warning associated with the domain should be resolved by the site operator and independently rechecked before sensitive interaction.

#### EVIDENCE

- The homepage identifies a trading name and service categories but does not provide the legal and regulatory identifiers needed for independent verification.
- The homepage directs visitors to a separate web presence, so the relationship between that destination and R&M Producciones should be independently confirmed.
- The page is informational and contains no built-in transaction or account workflow, making external identity and payment verification especially important before engagement.

### Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. The confirmed external threat and blacklist signals materially outweigh the otherwise ordinary, non-solicitational appearance of the page, while the responsible operator remains unverified.

### Infrastructure Integrity

The site is served directly from infrastructure operated by WHG-MEX - WHG Hosting Services Ltd in Great Britain, with no detected CDN or WAF layer and one likely origin address. Transport encryption is present, but it is domain-validated TLS and should be treated as encryption of the connection rather than evidence of organizational legitimacy.

#### EVIDENCE

- Served from AS211126, WHG-MEX - WHG Hosting Services Ltd, GB; resolved IP: 195.250.27.27.
- No CDN detected; infrastructure assessment identified 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- TLS certificate issuer: YR1; validation level: DV; valid to 2026-10-01T12:20:16+00:00, with 41 days remaining.

### Closing Assessment

Passive viewing may be retained for limited reference, but credentials, sensitive documents, payments, and other consequential interactions should be withheld until the counterparty and any relevant authorizations have been independently established.

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about rymproducciones.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
