## Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

## Full analysis

### Overview

Saba Consultants is a Dubai-based marketing and communications consultancy presenting inbound and content marketing, branding and creative services, annual-report production, case studies, blog content, contact details, and social-media links; its apparent business model is the delivery of client engagements, retainers, and project-based communications work.

### Scam/Impersonation Risk

No contradictions were observed. The website presents a coherent corporate-agency model, with promotional and informational content rather than payment solicitation, investment products, or credential-harvesting functionality. The homepage and associated content show no brand-impersonation indicators, phishing signals, suspicious forms, or other immediate fraud patterns. Available external reputation checks recorded no malicious or suspicious result, although reputation coverage was partial.

#### EVIDENCE

- The homepage identifies the site as a marketing and communications agency and presents services, insights, case studies, and social links consistent with that business model.
- The site's contact presentation includes business contact details and a physical address rather than an anonymous transaction-only interface.
- Behavioral inspection recorded no login form, hidden form, password-external form, wallet connection, clipboard manipulation, or cloaking behavior.
- Domain registration records show creation on 2010-12-21T21:56:31Z and an age of 15.67 years; the registrar is GoDaddy.com, LLC.

#### Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate corporate website, but the real-world operator identity is not independently verified. The site provides business-facing contact and agency information; however, the supplied content does not state a licensing authority or registration number. For a marketing consultancy, this is a commercial identity and contracting verification point rather than evidence of scam or impersonation. The site's registration privacy is an administrative detail and does not create an identity contradiction.

#### EVIDENCE

- The site presents phone, email, physical-address, and social-channel contact information on its corporate and contact content.
- Hosted on AS31898, Oracle Corporation, US.
- The site's TLS certificate is issued by YR1, uses Domain Validation (DV), and is valid to 2026-11-06T07:55:28+00:00.

#### What to Verify Next

Before a formal engagement, the prospective counterparty should independently confirm the agency's legal trading identity, contracting entity, and any locally applicable business registration through an authoritative registry or an offline business channel. Contract review should establish deliverables, cancellation or refund terms where applicable, invoicing ownership, and payment protections before credentials or payment details are exchanged. Official contact channels should also be confirmed independently before sensitive correspondence.

#### EVIDENCE

- The supplied page content describes the business as Dubai-based but does not provide a licensing authority or registration number.
- The site offers case studies, blog content, and service descriptions that can be cross-checked against independently obtained corporate or client references.
- No sensitive submission form or untrusted form destination was identified during inspection.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam, phishing, impersonation, or identity-conflict indicators were observed, while operator identity remains likely rather than independently verified.

Infrastructure Integrity

The site exhibits a direct-hosting posture with one resolved address and no identified CDN or WAF edge layer. No origin-candidate anomaly or other infrastructure concern was reported; the hosting arrangement is a mitigating technical context, not proof of business legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture, while independent counterparty, contractual, and payment-protection checks should be completed before credential or payment interactions.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

|                                  |        |
|----------------------------------|--------|
| Status                           | LIKELY |
| Identity score                   | 80/100 |
| Identity verification confidence | 40%    |

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of sabaconsultants.com.

- The request stayed on sabaconsultants.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by bluehost.com, across 2 name servers. NOTED
- The registration is paid up to 2027-12-21. CLEAR
- The earliest public archive of this site is from 2012-04-18. CLEAR
- It is hosted on ORACLE-BMC-31898, from a server in US. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about sabaconsultants.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
