

Is sabplascons.com a scam? TrustSniffer's high-risk assessment: 0/100

sabplascons.com

Verdict

0

OUT OF 100

CRITICAL RISK

sabplascons.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

A brief maintenance/'we'll be back soon' page for sabplascons.com with minimal text and a couple of management links (Whois, hosting account login). No forms, no offers, no evident monetization.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	6 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0% confidence AbuseIPDB, 3 reports; shared hosting inflates reports	CLEAR
Domain age	14 years old Registered history	CLEAR

sabplascons

What sabplascons.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

sabplascons.com is a maintenance/coming-soon website presenting a brief “we’ll be back soon” notice, a general contact prompt, and links relating to domain and hosting administration; it currently presents no identifiable operating business, products, services, or transactional model.

Scam/Impersonation Risk

The site carries a **confirmed blacklist signal** supported by two external sources, together with multiple malicious detections. These signals are materially more significant than the benign appearance of the maintenance page and drive the site’s sensitive-interaction risk. No conflicting legal identities or visible brand-impersonation elements were observed, and the page contains no login form, payment form, or evident credential-collection mechanism; however, those content-level observations do not offset the external threat detections. Separate abuse reports concern the shared hosting IP rather than the domain specifically and are therefore treated as contextual, not conclusive attribution to this site.

EVIDENCE

- External blacklist status is recorded for the domain by two evaluated sources.
- Multiple external detections classify the domain as malicious, while the homepage itself contains no visible sensitive form.
- Three abuse reports concern shared infrastructure associated with the hosting provider's IP, with the attribution explicitly discounted as provider-level reporting.

Regulatory Verification Notes

The current page is only a maintenance notice and does not identify an operating company, regulated activity, license, registration number, or responsible jurisdiction. This is a material verification gap if the site is expected to conduct commercial or regulated activity, although the page does not currently present such activity. Independent identity verification remains unresolved. The domain has nonetheless been registered for many years through GoDaddy.com, LLC, and the site uses valid domain-validated transport encryption; these are technical continuity and security signals, not proof of operator identity or regulatory standing. No matching broker-reputation record was identified in the available third-party context.

EVIDENCE

- Domain registered 2012-07-27; age 14.07 years; registrar GoDaddy.com, LLC.
- Archive record first seen 2013-06-17T18:50:31Z and last seen 2025-11-04T19:04:57Z; 13 years tracked.
- Hosted on AS28753 (LEASEWEB-DE-FRA-10 - Leaseweb Deutschland GmbH, DE).
- TLS certificate issued by YR2 (DV), valid to 2026-11-04T01:32:54+00:00.

What to Verify Next

Before any account, payment, contractual, or other sensitive interaction, an independent corporate-registry check should establish the responsible legal entity and its authority to operate. If the intended service is financial or otherwise regulated, the claimed operator should be matched against the relevant regulator's register using independently sourced contact details. Any future business or payment request should be validated through an offline or independently obtained communication route rather than relying solely on information that appears on the site.

EVIDENCE

- The homepage is limited to a temporary maintenance message, so substantive business and compliance claims are not currently available for validation.
- The site's visible content provides no completed commercial or regulated-service workflow against which operator claims could be tested.
- The available identity-verification result contains no independent real-world identity signals.

Summary Verdict

The overall posture is **critical trust risk**, with the site unsuitable for sensitive interaction at present. Its established domain registration and valid transport encryption do not overcome the confirmed adverse external

reputation, and the real-world operator remains unverified.

Infrastructure Integrity

The site resolves directly to a likely origin hosted by Leaseweb Deutschland GmbH rather than behind a detected CDN or WAF edge. This provides a clear hosting attribution but offers limited protective separation between the website and its origin; infrastructure characteristics are mitigating or contextual signals only and do not establish legitimacy.

EVIDENCE

- One unique IP and one likely origin IP were identified; edge IP count is 0.
- Hosting infrastructure: AS28753, Leaseweb Deutschland GmbH, Germany.
- No CDN was detected in the observed resolution path.

Closing Assessment

Passive viewing is the only proportionate current use; credentials, account creation, payments, downloads, and other sensitive actions should remain suspended until independent identity, authorization, and reputation checks produce a satisfactory result.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 3 reports on hosting IP 78.159.97.108 (Leaseweb Deutschland GmbH, Data Center/Web Hosting/Transit), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of sabplascons.com.

- The request stayed on sabplascons.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by hostingnox.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-27. NOTED
- The earliest public archive of this site is from 2013-06-17. CLEAR
- It is hosted on LEASEWEB-DE-FRA-10, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about sabplascons.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
