Full analysis

Overview

This website is an informational public-service site for the Secretaria de Asuntos Docentes La Matanza, presenting education-authority offices, named personnel, contact details, administrative notices, and regional communications rather than commercial products or financial services.

Scam/Impersonation Risk

No contradictions were observed. The homepage content is consistent with a local education-administration function: it identifies SAD1 and SAD2 offices, provides physical locations and telephone details, names regional and district education officials, and publishes administrative communications. The site does not present financial solicitations, commercial transactions, credential-harvesting forms, or brand-impersonation indicators; observed browsing also showed no hidden forms, external submissions, wallet activity, or suspicious script behavior. Available external reputation checks recorded no malicious detections, blacklist matches, or abuse reports, although coverage was not complete. The domain's sustained historical presence further supports continuity rather than a recently repurposed presentation.

EVIDENCE

- The homepage lists Secretaria de Asuntos Docentes La Matanza offices, officials, addresses, telephone numbers, and education notices.
- The site's interactive behavior recorded 2 successful runs, 0 external XHR requests, 0 hidden forms, 0 password forms, and 0 wallet-provider or wallet-drainer activity.
- Domain registration records show creation on 2011-02-14 and an age of 15.52 years.
- Web-archive records show 317 snapshots spanning 2011-04-18 to 2023-09-27, covering 13 years with a maximum gap of 1 year.

Regulatory Verification Notes

The site's apparent public-service purpose does not present a financial or other regulated commercial offering requiring a license on the face of the reviewed content. Its pages identify the Secretaria de Asuntos Docentes La Matanza and multiple officials and offices, but the available material does not independently verify the real-world operator or establish a formal legal-entity disclosure. This is a transparency and affiliation-verification point, not evidence of a scam. No contradictory legal identities were found, and the available third-party broker-reputation context contained no match. The domain is registered through dattatec.com SRL, with the registration record naming Silvio Oscar Brunetti; that record is an administrative registration signal and does not, by itself, prove institutional control of the website.

EVIDENCE

- The homepage provides institutional names, office addresses, official-role descriptions, and administrative communications.
- Hosting resolution identifies AS27823 - Dattatec.com, AR; the registry is LACNIC and the hosting country is Argentina.
- The site's transport certificate is issued by Sectigo Public Server Authentication CA DV R36, uses DV validation, and is valid to 2027-02-27.
- The page presents no financial-service license claim or license number.

What to Verify Next

Before relying on the site for consequential administrative decisions, the claimed relationship with the relevant education authority should be confirmed through an independently sourced government directory or an offline telephone route, rather than relying solely on contact details displayed on the site. Current notices should be cross-checked against a separately verified institutional channel, and any future request for credentials, documents, or payment should be validated through the authority's established procedures and applicable payment protections.

EVIDENCE

- The homepage supplies office locations and telephone numbers that can be compared with independently sourced institutional records.
- The reviewed pages contain communications and administrative information but no sensitive submission form or payment workflow.
- The site identifies regional and district education offices, providing specific institutional references for affiliation checks.

Summary Verdict

Overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate public-service website. The assessment supports routine informational use, while the real-world operator’s connection to the named institution remains unverified.

Infrastructure Integrity

The site is served directly through Dattatec.com infrastructure in Argentina, without a detected CDN or WAF edge layer. This is a conventional hosting arrangement and neither establishes legitimacy nor introduces a material concern in the context of the observed benign content and behavior.

EVIDENCE

- Infrastructure resolution identified one hosting address and no CDN edge addresses.
- The hosting organization is Dattatec.com, Argentina, as identified by the resolved infrastructure.

Closing Assessment

Ordinary informational access is proportionate to the current evidence; independent confirmation of institutional affiliation remains appropriate before acting on consequential administrative requests or sharing sensitive information.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about sadmatanza.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
