

Is saednews.com legit? TrustSniffer's high-trust assessment: 100/100

saednews.com

Verdict

100

OUT OF 100

HIGH TRUST

saednews.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 55%.

What this site appears to be

Persian-language news website (ساعدنیز) presenting headlines and articles across politics, society, economy, sports, culture and multimedia. The page content is editorial and ad-driven; no sign of payment flows or credential harvesting in the captured DOM.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This website is a Persian-language online news portal presenting editorial coverage of politics, society, economy, sports, culture, technology, entertainment, video, and photography, with an apparent advertising-supported publishing model rather than a transactional or account-driven service.

Scam/Impersonation Risk

No contradictions were observed. The captured homepage presents substantial topical editorial content, while the technical interaction review found no login form, sensitive form, hidden form, credential-harvesting behavior, wallet activity, clipboard manipulation, or suspicious script activity. External reputation checks found no malicious or suspicious detections, no confirmed phishing or impersonation signal, and no reported abuse associated with the hosting address. The site therefore presents an evidence-consistent profile of an established, apparently legitimate media service; however, the real-world operator identity is not independently verified.

EVIDENCE

- The homepage returned substantive editorial content and a stable successful response, with no sensitive forms or untrusted form destinations detected.
- The homepage's behavior review recorded zero wallet-connect, wallet-drainer, clipboard-hijack, hidden-form, or suspicious-inline-script events.
- The domain registration record states creation on 2017-09-11 and an age of 8.92 years.
- External reputation checks recorded 0 malicious and 0 suspicious detections; the site has a global traffic rank of 1633.

Regulatory Verification Notes

The site's apparent media function does not itself establish a regulated financial or payment activity. An About Us link is present, but the available evidence does not independently verify the legal operator, and no license claim or license number is disclosed in the supplied site material. This is a verification and disclosure gap rather than evidence of a scam. The registration record names CSL Computer Service Langenbach GmbH d/b/a joker.com as registrar and identifies Eshragh as the registration organization; those records provide administrative context but do not, by themselves, prove the operator's legal identity. No broker-data match was identified.

EVIDENCE

- The homepage navigation includes an About Us page, but the supplied capture does not establish independently verified operator identity.
- The registration record identifies CSL Computer Service Langenbach GmbH d/b/a joker.com as registrar and Eshragh as the organization.
- The site's hosting record identifies AS208161 and parsvds — Pars Shabakeh Azarakhsh LLC, IR.
- The site uses a valid DV TLS certificate issued by YE1, valid to 2026-11-06.

What to Verify Next

Before any credential or payment interaction, an independent check should reconcile the operator identified on the site with an appropriate corporate or media registry, confirm any authorization applicable to the proposed activity, and review the relevant terms, refund arrangements, and payment protections. Official contact channels should also be confirmed through an independent route rather than relying solely on information presented within the site.

EVIDENCE

- The available identity-verification status remains unverified despite the site's established content and domain history.
- No license claim or license number is recorded in the supplied site material.
- The captured homepage contains no payment flow or sensitive credential form, so any later commercial or account-based interaction would represent a different risk surface requiring separate review.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam, phishing, impersonation, or identity-conflict indicators were observed, while independent verification of the real-world operator remains incomplete.

Infrastructure Integrity

The site resolves directly to a single hosting address, with no detected CDN or WAF edge layer. This reduces the benefit of intermediary protective infrastructure but is an infrastructure characteristic rather than a legitimacy finding; the identified hosting environment and valid transport encryption provide baseline technical integrity.

EVIDENCE

- The site resolved to 45.156.187.18, with 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- No CDN or WAF vendor was detected.
- The resolved service is hosted on AS208161, Pars Shabakeh Azarakhsh LLC, in Iran.

Closing Assessment

Normal read-only browsing is proportionate to the evidence; before submitting credentials or making a payment, ordinary independent checks of operator identity, applicable terms, and payment protection should be completed.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of saednews.com.

- The request stayed on saednews.com. It was not redirected to another domain. CLEAR
- Registration is published under CSL Computer Service Langenbach GmbH d/b/a joker.com. CLEAR
- DNS for this domain is served by globalcdntech.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-11. NOTED
- It is hosted on parsvds, from a server in IR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about saednews.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
