- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2019.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Safe2Pay is a Brazilian B2B payment-services website presenting payment processing, PIX, boleto, credit-card acceptance, recurring billing, split payments, e-commerce checkout, payment machines, and developer integrations for businesses.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed malicious reputation findings were observed. The site's coherent payment-services identity, sustained historical presence, and clean external reputation support a legitimate and established interpretation.

- The homepage presents a consistent Safe2Pay corporate payment-services identity and contains no detected phishing or impersonation indicators.
- The domain was registered on 2014-07-04 and is 12.08 years old.
- Archive records contain 58 snapshots spanning 2019–2026 across 8 tracked years, with no suspicious repurposing detected.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist hit.

Regulatory Verification Notes

The site describes a conventional payment-technology and payment-intermediation business, including online and offline acceptance, recurring collections, payment splitting, checkout integration, and receivables anticipation. Its homepage links to legal and privacy materials and identifies a responsible business entity. No license or registration number was identified in the supplied site material; this is a regulatory-transparency item requiring ordinary confirmation, not evidence of deception. A third-party broker-intelligence lookup produced no match.

- The homepage identifies payment processing, PIX, boleto, credit cards, recurring billing, split payments, payment machines, and developer integrations.
- The homepage provides links for fees and tariffs, support, privacy, and terms.
- The site's transport encryption uses a DV certificate issued by GeoTrust TLS RSA CA G1, valid through 2027-01-13.
- The site is served from AS8075, Microsoft Corporation, United States.

What to Verify Next

Prospective business users should confirm the applicable payment-services authorization and registration details with the relevant Brazilian authority, review the published terms and tariffs, and validate official support channels through an independently sourced business contact.

- The homepage provides dedicated navigation for fees and tariffs, support, developers, terms, and privacy.
- The business model involves payment intermediation and receivables-related services, making regulatory-scope confirmation appropriate.
- The site offers account opening and login pathways for business users.

Summary Verdict

Safe2Pay presents as a legitimate, established, high-trust website with a coherent commercial purpose and no observed identity or fraud contradictions. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site is protected by a CDN/WAF, and the observed edge address belongs to Microsoft infrastructure on AS8075; the origin server was not observable in this analysis. This provides a meaningful exposure-mitigation layer, but remains supportive infrastructure rather than independent proof of legitimacy.

Closing Assessment

Normal account login and standard transactions are appropriate, subject to the prospective customer’s ordinary onboarding, contractual, and transaction-control procedures.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of safe2pay.com.br.

- The request stayed on safe2pay.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by azure-dns.com, across 4 name servers. NOTED
- The registration is paid up to 2031-07-04. CLEAR
- The earliest public archive of this site is from 2019-06-26. CLEAR
- It is hosted on MICROSOFT-CORP-MSN-AS-BLOCK, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about safe2pay.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
