

Is salahkaarconsultants.com a scam? TrustSniffer's high-risk assessment: 0/100

salahkaarconsultants.com

Verdict

0

OUT OF 100

CRITICAL RISK

salahkaarconsultants.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be

Salahkaar Consultants is an established HR services provider offering consulting, recruitment (RPO), training, psychometric testing, HR software and outsourcing. The site contains service descriptions, client lists, contact and sign-up/login elements. No investment, crypto or credential-harvesting patterns observed.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

https://salahkaarconsultants.com/

What salahkaarconsultants.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website presents Salahkaar Consultants as a corporate human-resources services provider, offering consulting, recruitment and recruitment-process outsourcing, training, psychometric and employee assessment, HR software, and broader outsourcing services to business clients.

Scam/Impersonation Risk

The site's homepage and service material have a coherent corporate HR profile, with no observed investment, cryptocurrency, wallet-connection, or credential-harvesting themes. However, that benign presentation conflicts with confirmed external blacklist status and multiple malicious detections associated with the domain. No separate brand-impersonation or conflicting legal-entity finding was established, but the reputation evidence is sufficiently serious to create a material risk for login, credential, financial, or other sensitive interaction. The site

should therefore be treated as potentially compromised, misclassified, or otherwise unsafe for sensitive use until independently resolved.

EVIDENCE

- The homepage describes HR consulting, recruitment, training, psychometric testing, HR software, and outsourcing rather than financial or cryptocurrency services.
- The homepage contains a login form, although no hidden forms, external password destinations, wallet activity, or credential-harvesting behavior was observed.
- External reputation telemetry recorded 12 malicious detections and 1 suspicious detection; the domain was also confirmed on external blacklists.
- Domain registration: created 2003-08-06 and currently approximately 23.05 years old; registrar: Network Solutions, LLC.

Regulatory Verification Notes

The About, management, ethics and transparency, client, and service pages provide substantial business descriptions, but the available material does not independently verify the real-world operator behind the website. No license, registration number, or regulator is identified in the supplied page evidence; this is a regulatory-disclosure gap rather than standalone proof of fraud. The apparent HR business model is internally coherent, but it does not offset the external reputation findings described above.

EVIDENCE

- Web-archive records show 266 snapshots from 2004-02-27 through 2026-06-11, covering 23 tracked years.
- The site is served from AS47583, AS-HOSTINGER - Hostinger International Limited, CY; the resolved infrastructure is registered through RIPE NCC and geolocated to UA.
- The site's TLS certificate uses issuer YE1, provides DV validation, and is valid through 2026-10-26T09:39:08+00:00.

What to Verify Next

Before any sensitive engagement, an independent party should confirm the legal entity, current operating status, and official contact channels using records or contact details obtained outside the website. Any proposed service contract, payment, account creation, or credential use should be withheld until those checks reconcile with the site's claimed business identity. If the site is being considered by an organisation, the relevant HR-service provider, software, or outsourcing relationship should also be validated directly with a known client or independently sourced corporate contact.

EVIDENCE

- The About and management pages contain identity and organisational claims that require independent corroboration.
- The ethics and transparency material provides a stated governance narrative but does not supply an independently verified regulator or registration reference.
- The site's login, newsletter, and contact/request forms create distinct interaction points requiring validation before operational use.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. Although the website has a long-running corporate presentation and a coherent HR-services profile, the confirmed blacklist status and malicious reputation detections dominate the assessment. The operator's real-world identity also remains unverified.

Infrastructure Integrity

The site does not use an identified CDN or WAF edge; four resolved addresses were assessed as likely origin candidates. Hosting is provided through Hostinger infrastructure, which supplies ordinary network hosting but should be treated only as a limited technical context, not as evidence of legitimacy.

Closing Assessment

Restrict activity to passive review unless and until independent identity, reputation, and operational checks produce a clear resolution; login, credential submission, payments, and other sensitive actions should not proceed meanwhile.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.

Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION

- The structure of the page changed sharply while it was loading.

Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of salahkaarconsultants.com.

- The request stayed on salahkaarconsultants.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under Network Solutions, LLC. [CLEAR](#)
- DNS for this domain is served by dns-parking.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-08-06. [NOTED](#)
- The earliest public archive of this site is from 2004-02-27. [CLEAR](#)
- It is hosted on AS-HOSTINGER, from a server in UA. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about salahkaarconsultants.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
