Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Saldão da Informática is a Brazilian online electronics retailer offering new and recertified notebooks, smartphones, iPhones, tablets, monitors, televisions, appliances, and accessories, supported by product sales, installment payments, delivery, warranty, returns, customer accounts, and technical assistance.

Scam/Impersonation Risk

No contradictions were observed. The storefront presents a coherent retail model, detailed product and fulfillment information, customer-support channels, and no supplied indicators of phishing, credential harvesting, brand impersonation, or malicious reputation. Its historical presence is continuous and consistent with an established commercial operation.

- Domain registered on 2012-04-11 (~14.32 years old).
- Web archives contain 436 snapshots spanning 2010–2026 (17 years tracked).
- The homepage identifies the business as an electronics retailer and contains no reported fraud indicators.

Regulatory Verification Notes

The site presents company registration details, a physical address, warranty and return policies, payment and delivery information, and support arrangements. No separate regulated-service license is claimed; for an electronics retailer, this is a transparency item for ordinary corporate and consumer-protection verification, not an identity contradiction. External reputation checks were clean, and no broker-related match was identified.

- Hosted on AS13335 (Cloudflare, Inc., US).
- TLS certificate issued by WE1, validation level DV, valid to 2026-10-02.
- The homepage and policy content describe warranty, returns, payment, delivery, and customer-support procedures.

What to Verify Next

Before a material purchase, independently reconcile the company registration and physical address with the relevant Brazilian corporate registry, and review the applicable payment, delivery, warranty, and return terms at checkout. Contact details should be confirmed through an independent channel before resolving any unusual transaction issue.

- The homepage lists customer-service hours and a telephone contact.
- The storefront provides dedicated information on warranty, returns, payment, and delivery.

- Account and order-management functions are presented as standard ecommerce features.

Summary Verdict

The website has a legitimate, established, and trustworthy posture with no observed contradiction between its identity, business model, historical presence, technical operation, and external reputation. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

Cloudflare CDN and WAF protection are in place, with all observed addresses belonging to CDN edge infrastructure and no origin address exposed in the analysis. This provides a meaningful protective layer for service availability and origin shielding, while remaining a mitigating infrastructure signal rather than proof of legitimacy.

- Six observed IP addresses were classified as CDN edge addresses.
- All observed edge addresses were associated with AS13335 and Cloudflare.
- Likely origin IP count: 0.

Closing Assessment

Standard account access and ordinary purchasing activity are appropriate, subject to normal commercial checks for order, payment, delivery, and returns.

- The site presents standard ecommerce account and order functions.
- The stated business model is conventional retail sales of electronics.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of saldaodainformatica.com.br.

- The request stayed on saldaodainformatica.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2031-04-11. CLEAR
- The earliest public archive of this site is from 2010-04-06. CLEAR

- It is hosted on CLOUDFLARENET, from a server in US. **NOTED**

About this assessment

A trust score summarises the evidence TrustSniffer could collect about saldaodainformatica.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
