## The page as captured

<https://www.salyers-law.com/>

What salyers-law.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

## Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

## Full analysis

### Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Salyers Law is an informational legal-services website presenting articles and practice-area pages covering personal injury, truck accidents, insurance law, estate planning, Social Security Disability, and business or corporate law, with consultations and client-service enquiries as its apparent business model.

### Scam/Impersonation Risk

The site has a **high-risk interaction posture** because external threat intelligence recorded malicious detections and confirmed blacklist entries from multiple sources, including six malicious evaluations and Tier-1 detections associated with Fortinet and Sophos. This evidence outweighs the otherwise conventional legal-services presentation and the absence of page-level login, phishing-form, wallet, or obvious brand-impersonation indicators. A captured article also refers to "Carabin Shaw" while the site is branded "Salyers Law"; this is a content-integrity anomaly, although the available analysis does not classify it as a confirmed identity contradiction. The site should therefore not be treated as reliable for credential, financial, or other sensitive interactions.

#### EVIDENCE

- External reputation assessment recorded `vt\_malicious: 6`, `external\_blacklist: true`, and Tier-1 threat detection associated with Fortinet and Sophos.
- The homepage and practice-area content present a conventional legal-services model, with no detected login form, hidden sensitive form, wallet connection, or confirmed brand-impersonation indicator.
- A captured truck-accident article on the site uses the “Carabin Shaw” name while the surrounding site branding identifies “Salyers Law.”

### Regulatory Verification Notes

The available pages describe legal information and client representation services, but the site does not present a licensing authority or license number in the supplied content. That is a regulatory-transparency gap requiring independent confirmation, not by itself proof of misconduct. The real-world operator identity remains unverified, and the site’s low page-authority signal provides no independent basis for treating its legal-service claims as established. The confirmed blacklist and malicious detections remain the principal trust concern rather than a licensing conclusion.

#### EVIDENCE

- The homepage and practice-area pages identify topics including personal injury, truck accidents, insurance law, and estate planning and invite consultation enquiries.
- The supplied legal and identity content contains no stated license authority or license number.
- Domain registration telemetry: registered 2026-03-16 15:10:15 UTC through NAMECHEAP INC; current age reported as 0.43 years.
- Hosting telemetry: served from AS55293, A2HOSTING – A2 Hosting, Inc., US; TLS certificate issued by YR1 at DV validation level, valid to 2026-10-28 11:40:21 UTC.

### What to Verify Next

Before any sensitive engagement, an independent party should confirm the named law firm and responsible attorneys through the applicable state bar or professional registry, validate the firm’s physical and telephone details through an offline or independently sourced channel, and obtain engagement, fee, privacy, and client-funds documentation directly from a verified representative. Any proposed payment or transfer should be checked through an independently confirmed billing channel rather than relying solely on information presented on the site.

#### EVIDENCE

- The site provides a contact form for consultations and client enquiries.
- The site includes “Terms & Conditions” and “Anti Spam Policy” pages, which should be reviewed for operator and service details.
- Archive telemetry records 85 snapshots spanning 2021–2026, with six years tracked.

## Summary Verdict

The overall posture is **critical trust risk**, with the available evidence unsuitable for endorsing sensitive interaction. The website's professional legal content does not overcome the external threat and reputation contradictions, while independent operator identity verification remains incomplete.

## Infrastructure Integrity

The site resolves directly to a single apparent origin address hosted by A2 Hosting in the United States on AS55293; no CDN was detected. This infrastructure provides a technically identifiable hosting context but does not mitigate the confirmed reputation risk or establish legitimacy.

## Closing Assessment

Prospective users should restrict activity to passive review until the operator, professional authorization, and communication and payment channels have been independently confirmed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

## What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

  - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.  
Registration and ownership rule:KF\_WHOIS\_PRIVATE
  - The registration record withholds contact details for the operator.  
Registration and ownership rule:KF\_WHOIS\_HIDDEN
- 02 Sensitive Interaction Risk

  - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.  
Analysis engine signal:direct\_threat
  - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.  
External reputation rule:EXT\_BLACKLIST\_CRITICAL

## Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 25%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of salyers-law.com.

- The request stayed on salyers-law.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by registrar-servers.com, across 2 name servers. NOTED
- The registration is paid up to 2028-03-16. CLEAR
- The earliest public archive of this site is from 2021-12-16. CLEAR
- It is hosted on A2HOSTING, from a server in US. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about salyers-law.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
