Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Sampurna Strategies is a corporate consultancy website presenting itself as a Delhi-based boutique management consulting firm that provides human-resources services, change management, business-process transformation, training, and quality-management support to business clients.

Scam/Impersonation Risk

No contradictions were observed across the available website content and technical evidence: there were no phishing indicators, brand-impersonation indicators, malicious reputation findings, or conflicting legal identities. The homepage presents a coherent professional-services model, including recruitment-process support, HR manuals, payroll coordination, training, process reengineering, and quality methodologies such as 5S and lean management. The site does display a conspicuously large visitor counter, but this is a credibility-quality issue rather than evidence of impersonation or fraud. Automated interaction testing recorded external requests and console errors, yet no hidden forms, password-exfiltration forms, wallet activity, clipboard manipulation, or cloaking were detected; these observations do not establish malicious behavior.

EVIDENCE

- The homepage identifies the business as “Sampurna Strategies” and describes Delhi-based HR, change-management, business-transformation, training, and quality-management services.
- Domain registration evidence shows a creation date of 2016-03-02 and an age of 10.47 years.
- Historical records show 612 archive snapshots from 2017-04-30 through 2026-03-02, covering 10 tracked years with a maximum recorded gap of 1 year.
- Interaction testing recorded 18 external XHR requests and 10 external POST requests, but zero non-whitelisted external requests, zero hidden forms, and zero wallet-related runs.

Regulatory Verification Notes

Available evidence is consistent with an established, apparently legitimate consultancy, but the real-world operator identity is not independently verified. The site provides company information, testimonials, service descriptions, and contact details, while the available material does not present a license number or regulatory authority. For a management-consulting and training business, that is a disclosure and engagement-verification point rather than evidence of a scam; any regulated service outside the stated consulting scope would require separate confirmation. No matching third-party broker-reputation record was identified, which is contextual support but not a legal or licensing determination.

EVIDENCE

- The homepage and linked corporate pages include About Us, Mission and Vision, Our Team, Customer Reviews, Case Studies, Career, and Contact Us content.
- The site's stated services include HR documentation, recruitment, training, payroll coordination, process transformation, and quality-management implementation.
- Hosting telemetry identifies AS394695, PUBLIC-DOMAIN-REGISTRY - PDR, US.
- The site uses a valid DV TLS certificate issued by YR1, with validity to 2026-10-23.

What to Verify Next

Before a commercial engagement, an organization should independently confirm the consultancy's legal operating details, the identities of responsible representatives, and the authenticity of the published contact channels. The engagement documentation should define deliverables, fees, confidentiality, data handling, termination, refund or cancellation terms, and payment protections. If a proposed service involves regulated advice, employment compliance, or another licensed activity, the relevant authority and registration should be checked directly.

EVIDENCE

- The site provides contact details and corporate information but does not independently establish the real-world operator identity.
- The available business description is centered on professional consulting and training rather than a stated regulated financial or investment service.
- The homepage contains client testimonials and case-study references that can be validated independently before contracting.

Summary Verdict

The website has a **high-trust, low-risk posture** and is evidence-consistent with an established professional consultancy. No scam, phishing, impersonation, or identity-conflict indicators were observed, although the operator connection remains independently unverified.

Infrastructure Integrity

The site resolves to a single identified hosting address in India on AS394695, operated through PUBLIC-DOMAIN-REGISTRY - PDR, US, without a detected CDN or WAF layer. Its valid DV TLS certificate provides transport confidentiality and server-side encryption, but the hosting arrangement itself is a mitigating technical control rather than proof of organizational legitimacy.

Closing Assessment

Ordinary browsing and routine business evaluation are proportionate; credential or payment interactions should follow independent confirmation of the counterparty, engagement terms, and available payment protections.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of sampurnastrategies.com.

- The request stayed on sampurnastrategies.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by webhostbox.net, across 2 name servers. NOTED
- The registration is paid up to 2028-03-02. CLEAR
- The earliest public archive of this site is from 2017-04-30. CLEAR
- It is hosted on PUBLIC-DOMAIN-REGISTRY, from a server in IN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about sampurnastrategies.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
