

Is sanitariospasabe.com a scam? TrustSniffer's high-risk assessment: 0/100

sanitariospasabe.com

Verdict

0

OUT OF 100

CRITICAL RISK

sanitariospasabe.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 75%.

What this site appears to be

PA.SA.BE is a local hardware and sanitary supply store website in Spanish. It lists product categories, highlights 40 years of experience, offers delivery and payment options (debit/credit/Mercado Pago), and provides phone, WhatsApp and email contact details.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Homepage

What sanitariospasabe.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2017.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

PA.SA.BE is a Spanish-language local hardware, sanitary-supply, and construction-materials storefront. It presents product categories such as sanitary fixtures, tools, gas-installation materials, and dry-construction supplies, with a business model based on direct sales, delivery, technical advice, and orders through local contact channels.

Scam/Impersonation Risk

The supplied homepage content describes a conventional local retailer and does not show a login form, hidden sensitive form, cryptocurrency activity, or apparent brand impersonation. No conflicting legal-entity names were observed. However, the domain is subject to a confirmed **blacklist** signal, with multiple malicious detections from external security services, including Fortinet and Sophos. This is a material contradiction to the otherwise ordinary storefront presentation and drives a security-forward posture for credentials, payment details, and other sensitive interactions. No suspicious contact-email anomaly was identified in the supplied evidence.

EVIDENCE

- External reputation assessment recorded 13 malicious detections and confirmed blacklist status; Fortinet and Sophos were among the flagged vendors.
- The homepage is categorized as a local ecommerce storefront and contains no login form, hidden form, or sensitive-input form.
- Domain registration: 2014-09-04 (~11.97 years old), through PDR Ltd. d/b/a PublicDomainRegistry.com.
- Web-archive records contain 940 snapshots from 2017-04-30 through 2026-02-02, spanning 10 tracked years; the historical record indicates continuity rather than suspicious repurposing.

Regulatory Verification Notes

The site's apparent activity is retail sale of hardware and sanitary products rather than a clearly regulated financial service. The supplied content does not present a license number or licensing authority, so the relevant issue is disclosure and business-identity verification rather than a demonstrated regulatory breach. The site's apparent commercial presentation, long registration history, sustained archival presence, and technically valid transport encryption provide continuity signals, but the real-world operator remains independently unverified and these signals do not neutralize the confirmed external threat detections.

EVIDENCE

- The homepage identifies PA.SA.BE and describes sanitary, hardware, dry-construction, installation-advice, delivery, and payment services.
- The site is hosted on AS264649 (AS264649 - NUT HOST SRL, AR).
- TLS uses issuer YR2 with DV validation and is valid to 2026-10-01T05:05:13+00:00.
- The homepage states that the business accepts debit cards, credit cards, and Mercado Pago.

What to Verify Next

Before any sensitive interaction, an organization should independently confirm that the physical business, telephone contact, and payment recipient correspond to the intended retailer, using an offline or independently sourced route rather than relying solely on the website. Any applicable local business registration or sector-specific requirements should be checked with the relevant authority. Payment should be made only through a channel that provides established buyer protection, and credentials or payment information should not be submitted until the blacklist findings have been resolved or credibly explained.

EVIDENCE

- The homepage provides telephone, WhatsApp, and email contact channels that can be cross-checked independently.
- The homepage states that delivery, on-site service, quotations, and technical advice are available.
- Technical behavior testing recorded no wallet connection, clipboard activity, hidden forms, or externally posted password forms.

Summary Verdict

The overall posture is **critical trust risk**. Although the site presents a coherent local-retail proposition and shows indicators of historical continuity, the confirmed external security contradiction is decisive and the operator’s identity is not independently verified.

Infrastructure Integrity

The site resolves directly to one likely origin address, with no detected CDN or WAF edge layer. The hosting infrastructure is therefore a basic, directly exposed hosting arrangement rather than a protective architecture that would materially mitigate the adverse reputation signal.

EVIDENCE

- Resolved server IP: 167.250.5.35.
- Unique IP count: 1; edge IP count: 0; likely origin IP count: 1.
- CDN detected: false; trusted CDN: false.

Closing Assessment

The appropriate institutional posture is to suspend credential, payment, and other sensitive interactions until independent business verification and authoritative resolution of the adverse security detections have been completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

Analysis engine signal:direct_threat

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of sanitariospasabe.com.

- The request stayed on sanitariospasabe.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by servidoraweb.net, across 2 name servers. NOTED
- The registration is paid up to 2026-09-04. NOTED
- The earliest public archive of this site is from 2017-04-30. CLEAR
- It is hosted on AS264649, from a server in AR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about sanitariospasabe.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
