Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2005.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the German online presence and donation portal of Save the Children Deutschland e.V., presenting child-rights advocacy, humanitarian relief programmes, emergency campaigns, and ways for individuals, companies, foundations, and public institutions to fund child-welfare work.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or malicious reputation findings were observed. The homepage supports one-time and recurring donations through visible forms whose submissions showed no untrusted destination; it also identifies an organizational bank account and explains how donated funds are used. This alignment between the declared charitable purpose, donation mechanics, public-facing identity, and long historical footprint provides strong evidence that the website is authentic rather than an imitation or opportunistic fundraising site.

- The homepage identifies Save the Children Deutschland e.V. and presents a coherent child-focused humanitarian mission, donation programme, and emergency-response portfolio.
- The homepage contains two forms—for donations and newsletter subscriptions—with no hidden forms, external password submission, or untrusted form destination detected.
- The domain dates to 2005 (~21.5 years old); 3,435 archive snapshots span 2005–2026 (22 years tracked), with no suspicious repurposing or semantic drift detected.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no unsafe-browsing finding, no reported abuse, and an established top-one-million traffic position at rank 390,352.

Regulatory Verification Notes

The site presents a clear nonprofit identity rather than offering regulated financial or investment services. Its governance material includes the 2025 annual report, donation-allocation information, nonprofit tax information, organizational structure, institutional partners, safeguarding principles, and descriptions of independent controls. These disclosures are substantively consistent with an established charitable entity; the absence of a financial-services licence claim is appropriate to the stated operating model and is not an adverse indicator.

- The “Transparency and Control” area provides the 2025 annual report, donation-use information, control-system descriptions, and organizational working principles.
- The “About Us” and downloads areas present organizational structure, institutional partners, reports, studies, safeguarding commitments, and contact information.
- The hosting infrastructure is served from AS15817 by Mittwald CM Service GmbH & Co. KG in Germany.

- The site's transport encryption uses a certificate issued by YR1 with DV validation, valid until 2026-09-07.

What to Verify Next

For unusually large donations, institutional partnerships, testamentary gifts, or restricted-purpose funding, the relevant current annual report and donation-allocation terms should be reviewed, and payment instructions should be confirmed through an independently obtained official channel. Corporate and foundation donors should also align the charity's documentation with their own tax, sanctions-screening, and beneficiary-due-diligence requirements.

- The homepage offers distinct pathways for major gifts, philanthropy, foundations, corporate participation, and testamentary donations.
- The site publishes dedicated materials for companies alongside reports, studies, donation magazines, and annual reports.
- The navigation includes donation-use explanations, frequently asked questions, cancellation information, and information concerning a service-provider data-protection incident.

Summary Verdict

The website is a legitimate, established, and trustworthy charitable platform. Its coherent institutional identity, mature public reporting, extensive historical continuity, clean external reputation, and benign observed behaviour support normal interaction, including donations, subscriptions, account login, and standard use.

Infrastructure Integrity

The site resolves directly to a single likely origin server in Germany and does not appear to use a CDN or WAF. This is a conventional hosting arrangement; although it provides less edge-layer shielding than a CDN-backed deployment, the observed infrastructure was stable and showed no abuse-ready or suspicious network pattern.

Closing Assessment

Prospective users may interact with the site normally, while organizations and unusually large donors should apply their standard payment-confirmation and counterparty due-diligence procedures.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of savethechildren.de.

- The request stayed on savethechildren.de. It was not redirected to another domain. CLEAR
- DNS for this domain is served by ui-dns.biz, across 4 name servers. NOTED
- The earliest public archive of this site is from 2005-01-29. CLEAR
- It is hosted on MITTWALD-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about savethechildren.de at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
