

Is savethechildren.net legit? TrustSniffer's high-trust assessment: 90/100

savethechildren.net

Verdict

90

OUT OF 100

HIGH TRUST

savethechildren.net appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 55%.

What this site appears to be

Official-style Save the Children International homepage presenting global humanitarian work, organizational impact, current emergency appeals, news, and a one-time or monthly donation interface. It includes strong legal-identity and transparency cues, including charity and company registration numbers, a registered London address, policy links, leadership and history pages, and a Trust Centre.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is Save the Children International's humanitarian and child-welfare platform, presenting its global programs, emergency appeals, impact reporting, research, and opportunities for one-time or recurring donations, partnerships, and institutional support.

Scam/Impersonation Risk

No identity contradictions, impersonation indicators, phishing behavior, or adverse reputation signals were observed. The long-established domain, consistent organizational presentation, clean external threat reputation, and substantial global traffic footprint strongly support the site's authenticity. Its donation form remained within a trusted destination, with no hidden forms, credential capture, cloaking, wallet activity, clipboard manipulation, or suspicious scripts detected.

- The domain-registration record shows registration through Network Solutions, LLC on 12 March 1998, making the domain approximately 28.41 years old; registration runs to 11 March 2030.
- The homepage consistently identifies Save the Children International and provides humanitarian-program, organizational-impact, leadership, history, and research content.
- External reputation checks recorded 0 malicious and 0 suspicious classifications, no safe-browsing threat finding, no abuse reports, and no matched threat signatures.
- The domain holds a global traffic rank of 29,984, placing it within the established top-million web footprint.

Regulatory Verification Notes

The homepage provides strong legal-identity and accountability cues, including charity and company registration numbers, a registered London address, policy materials, leadership and history pages, and a dedicated Trust Centre. These disclosures are appropriate to the organization's nonprofit and donation-funded model and materially strengthen identity confidence. No financial-services licensing claim was presented; such licensing is not indicated as relevant to the stated humanitarian-charity activity. The use of a privacy service in the domain-registration record is an administrative arrangement and does not conflict with the organization identified on the website.

- The homepage publishes company and charity registration identifiers alongside a registered physical address in London.

- The site navigation provides About Us, History, Leadership, policy, impact, research, and Trust Centre resources.
- The site's transport encryption uses a WE1-issued domain-validated TLS certificate, valid to 9 October 2026.
- The observed hosting endpoint was served from AS13335 (Cloudflare, Inc., US).

What to Verify Next

For material donations or institutional engagement, the published company and charity identifiers should be matched with the relevant official registries, and the beneficiary name shown by the payment processor should be checked against the disclosed organization. Procurement teams should obtain current governance, safeguarding, financial-reporting, and data-processing documentation directly through established organizational channels. Official contact channels may also be confirmed through an independent, offline source when initiating a new institutional relationship.

- The homepage offers both one-time and monthly donation options through a payment form with no observed untrusted destination.
- The site presents supplier, partnership, careers, campaigning, and donation pathways for distinct engagement types.
- The Trust Centre and policy links provide identified starting points for institutional due diligence.
- The homepage describes operations across a broad international country and regional network.

Summary Verdict

The website is a legitimate, established, and trustworthy online presence for Save the Children International. Its coherent institutional identity, mature operating footprint, clean security reputation, and substantive accountability content converge strongly, with no contradictory risk signals identified.

Infrastructure Integrity

The site is protected by Cloudflare's CDN and WAF, with all six observed addresses attributable to Cloudflare edge infrastructure and no origin-server candidate exposed during the assessment. This configuration reduces direct infrastructure exposure and supports resilience, although protective infrastructure is a mitigating security control rather than independent proof of organizational legitimacy.

Closing Assessment

Normal interaction, including account access, standard site use, and donations through the established payment flow, is appropriate; institutional or unusually large commitments may proceed through ordinary counterparty due-diligence controls.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	25%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of savethechildren.net.

- The request stayed on savethechildren.net. It was not redirected to another domain. CLEAR
- Registration is published under Network Solutions, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2030-03-11. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about savethechildren.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
