

Is sawdex.com safe? TrustSniffer's moderate-trust assessment: 65/100

sawdex.com

Verdict

65

OUT OF 100

MODERATE TRUST

sawdex.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Dynamic Interaction Caution

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Corporate landing page for 'Sawdex' focused on precision sawmill automation. Contains contact form and newsletter signup, cookie notice, and references to Airo AI Builder. No login, payment, or investment functionality detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	None flagged it VirusTotal	CLEAR
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	26% confidence AbuseIPDB, 13 reports; shared hosting inflates reports	CLEAR
Domain age	1.6 years old Registered history	CLEAR
Web archive	Archived since 2025 Public history exists	CLEAR

The page as captured

<https://sawdex.com/>

What sawdex.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Governance Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2025.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Sawdex is a corporate B2B website presenting “Precision Sawmill Automation” and inviting prospective customers to make contact or subscribe for updates, while also referencing the Airo AI Builder platform used in its site creation.

Scam/Impersonation Risk

No contradictions were observed: the supplied evidence shows no blacklist or phishing hit, no suspected brand impersonation, no conflicting legal identities, and no page-level fraud indicators. The homepage behaves as a corporate landing page rather than a financial or credential-collection service, with no login, payment, investment, wallet, or hidden sensitive forms detected. A shared Amazon infrastructure address has received abuse reports, but the attribution is to the shared provider environment rather than specifically to Sawdex; this is therefore a soft infrastructure-reputation signal, not evidence of site-specific abuse. Dynamic testing did identify unusually extensive external request activity and console errors, although it found no cloaking, wallet activity, clipboard manipulation, password-external forms, or hidden forms.

EVIDENCE

- Homepage: no login, payment, investment, wallet-connection, or hidden sensitive form was detected; the observed forms were a contact form and newsletter signup.
- Browser behavior: 117 external XHR requests were observed, including 110 non-whitelisted requests; the maximum external activity ratio was 97.5%, with 10 console errors across two successful runs.
- Shared hosting-IP telemetry: 13 abuse reports were associated with 76.223.105.230, attributed to Amazon.com, Inc. CDN infrastructure rather than specifically to the website.
- Registration and historical telemetry: the registration record lists creation on 2026-08-01 with an age of 0.05 years; historical continuity was first observed on 2025-01-21, with an authoritative domain age of 1.5770020533880904 years.

Regulatory Verification Notes

The site presents a straightforward industrial B2B model and does not solicit regulated financial activity. However, the supplied homepage content identifies the brand as “Sawdex” without providing a corporate legal name, registration number, licensing statement, or licensing authority. This is a disclosure and verification gap rather than evidence of a scam. The available evidence is consistent with a genuine corporate landing page, but the real-world operator identity remains unverified. The external broker dataset returned no match; that result is contextual only and does not establish legal status or licensing.

EVIDENCE

- Homepage: describes “Precision Sawmill Automation” and provides business lead capture, but no legal entity, company registration, or licence details are shown in the supplied content.
- Transport encryption: TLS validation level is DV; the certificate issuer is GoDaddy TLS Intermediate CA DV - R1v1, valid to 2026-10-30T16:26:03+00:00.
- Hosting telemetry: served from AS16509, Amazon.com, Inc., US.
- Historical record: first seen on 2025-01-21; total archive snapshots recorded as 0 across 1 year tracked.

What to Verify Next

Before a high-value commercial engagement, the prospective counterparty should confirm the legal entity represented by Sawdex through an applicable corporate registry and obtain contractual documentation identifying the responsible business. If the proposed engagement involves regulated services, financing, or material personal-data processing, the relevant licensing and privacy obligations should be confirmed independently. Contact details should also be validated through an independently sourced business channel rather than relying solely on the website’s lead form.

EVIDENCE

- Homepage: the visible business model is B2B product and service lead generation, making counterparty identification and contracting the relevant next verification.
- Homepage legal and privacy area: a cookie notice and references to Google reCAPTCHA privacy and terms are present, but the supplied content does not establish the operator's legal identity.
- Contact functionality: one non-sensitive contact form and one newsletter signup are present; no payment or account workflow was identified.

Summary Verdict

Sawdex has a **moderate, evidence-consistent trust posture** with no observed scam or impersonation contradictions. Its presentation and technical operation are compatible with a low-risk corporate information site, while confidence is limited because the real-world operator identity is not independently verified.

Infrastructure Integrity

The website is protected by CDN/WAF infrastructure and resolves through Amazon-hosted edge services, which provides a mitigating layer against direct exposure and common delivery threats. The presence of potential origin candidates means the infrastructure should be regarded as protective but not as proof of legitimacy.

Closing Assessment

Routine informational browsing and an initial B2B inquiry are proportionate; independent counterparty and contractual checks should precede any high-value commitment or sensitive data exchange.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, behaviour in a sandbox.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Dynamic Interaction Caution

- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR

Signals weighed against the site

- AbuseIPDB: 13 reports on hosting IP 76.223.105.230 (Amazon.com, Inc., Content Delivery Network), 26% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of sawdex.com.

- The request stayed on sawdex.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-01. NOTED
- The earliest public archive of this site is from 2025-01-21. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about sawdex.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
