

Is sbcgloballoginn.com safe? TrustSniffer's moderate-trust assessment: 69/100

sbcgloballoginn.com

Verdict

69

OUT OF 100

MODERATE TRUST

sbcgloballoginn.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Dynamic Interaction Caution

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

A multi-article gaming blog focused on online gaming trends, virtual reality, esports, community aspects, benefits and risks of gaming, and industry/economic impact. Content appears editorial and informational with occasional gambling-related keywords present in text.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

The page as captured

<https://sbcgloballoginn.com/>

What sbcgloballoginn.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Governance Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Ultimate Blogging Championship is a content-driven gaming blog presenting articles on online gaming, virtual reality, esports, gaming communities, healthy gaming practices, and the broader social and economic effects of the gaming industry. Its apparent business model is editorial publishing supported by advertising, affiliate links, or sponsored content rather than the direct provision of financial services.

Scam/Impersonation Risk

No contradictions were observed: the available findings contain no phishing, impersonation, confirmed blacklist, malicious reputation, or conflicting legal-entity signal. The homepage presents substantial editorial material and no login, password, payment, wallet-connection, or other sensitive form. Dynamic testing did identify one suspicious inline script, substantial post-interaction document changes, elevated external activity, and repeated console errors; these are technical-behaviour concerns requiring monitoring, but they do not establish deceptive intent in this case. The site's occasional gambling-related wording is presented within gaming articles rather than as an identified gambling service.

EVIDENCE

- Homepage: article content covers online gaming, virtual reality, esports, gaming communities, and gaming-industry topics; no phishing or brand-impersonation indicator was identified.
- Homepage interaction testing: 1 suspicious inline script, 14 console errors, and a maximum post-interaction DOM difference of 4,952.
- Homepage interaction testing: 28 external XHR/fetch requests, 16 external posts, and 9 non-whitelisted external requests were recorded; no hidden forms, wallet runs, password-external forms, or clipboard-hijack activity were detected.
- Historical record: 0 archive snapshots are reported, with first seen 2020-09-25T22:16:03Z, last seen 2025-12-30T22:17:50Z, and 6 years tracked.

Regulatory Verification Notes

The site presents as an informational blog, not as a broker, exchange, lender, investment provider, or other regulated financial service. No license claim or licensing number is recorded, so there is no regulatory authorization to assess from the website; this is a disclosure point rather than evidence of a scam. The real-world operator remains independently unverified, and the site's moderate trust posture therefore reflects apparent legitimacy of the web presence rather than proof of a particular legal entity. External reputation evidence is broadly non-adverse: no broker-dataset match was identified, the observed infrastructure had no abuse reports, and no malicious or suspicious reputation result was recorded among the evaluated checks, although reputation coverage was partial.

EVIDENCE

- Registration record: registered 2024-11-24 (~1.74 years old) through REGISTER S.P.A.; expiration is 2026-11-24.
- Hosting telemetry: served from AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- Transport security: TLS certificate issued by WE1 at DV validation level, valid to 2026-10-05T19:00:40+00:00.
- Homepage: page classification is Article / Blog, with no sensitive form and no stated financial-service license or license number.

What to Verify Next

Before any sensitive or high-value engagement, an independent party should confirm that the site's published identity and contact channels correspond to the intended operator, review any applicable advertising or affiliate disclosures, and assess whether linked third-party services have their own terms, privacy notices, and consumer protections. If the site is later used to promote a regulated service, the relevant license and entity should be checked directly with the competent registry rather than relying on the site's own presentation.

EVIDENCE

- Homepage: confirm that article content, advertising, affiliate, and sponsored-content disclosures are clearly identified where applicable.
- Contact or legal pages, if used: cross-check the named operator and contact channels through an independent route.
- Any outbound commercial page: review the third party's terms, privacy notice, refund or consumer-protection arrangements, and regulatory status separately.

Summary Verdict

The website supports a **moderate-trust** posture with no observed scam or impersonation contradiction. Its editorial purpose and generally non-sensitive interaction model are consistent with ordinary informational use, while the available evidence does not independently establish the real-world operator behind the site.

Infrastructure Integrity

Cloudflare provides the site's CDN and WAF protection, and all observed addresses were Cloudflare edge infrastructure rather than a directly exposed origin. This reduces routine exposure of the hosting environment and is a mitigating technical control, but it does not by itself validate the site's ownership or content.

Closing Assessment

Ordinary reading is proportionate to the observed posture; sensitive credentials, payments, or other consequential actions should follow independent identity and service-provider checks.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, behaviour in a sandbox.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Dynamic Interaction Caution

- The page carried inline scripts written in a style TrustSniffer treats as suspicious.
Behaviour in a sandbox rule:BEHAV_SUSPICIOUS_INLINE_SCRIPTS
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- The page rewrote itself after it was interacted with, so what a visitor first sees is not what they end up on.
Behaviour in a sandbox rule:BEHAV_DOM_DIFF_AFTER_INTERACTION
- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of sbcgloballoginn.com.

- The request stayed on sbcgloballoginn.com. It was not redirected to another domain. CLEAR
- Registration is published under REGISTER S.P.A.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-24. NOTED
- The earliest public archive of this site is from 2020-09-25. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about sbcgloballoginn.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
