Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the corporate product portal of ООО СК «Сбербанк страхование жизни», presenting life and health insurance, mortgage coverage, savings plans, and investment-linked insurance for online customer acquisition and policy servicing.

Scam/Impersonation Risk

No identity contradictions, impersonation indicators, phishing behavior, malicious reputation findings, or deceptive return claims were observed. The long-established domain, extensive historical continuity, substantial global traffic footprint, and consistent corporate-insurance presentation strongly support the site's legitimacy.

- Domain-registration records show registration through RU-CENTER-RU on 25 May 2012, making the domain approximately 14.2 years old; registration extends to 25 May 2027.
- Historical records contain 1,752 archive snapshots from 5 April 2013 through 9 June 2026, spanning 14 tracked years without evidence of suspicious repurposing.
- External reputation telemetry recorded 0 malicious and 0 suspicious detections, no search-browser safety finding, no reported abuse, and no signature matches.
- Traffic data places the domain at rank 53,818 globally, within the top one million websites.

Regulatory Verification Notes

The homepage presents a coherent legal identity and states that Bank of Russia licences, financial disclosures, policy documents, support channels, and a Moscow address are available. This is substantive institutional disclosure consistent with a regulated life-insurance provider. The supplied evidence does not include licence numbers or an independent registry confirmation; this is a limited verification point, not evidence of fraud or an identity conflict. No matching broker-reputation entry was identified, but that result carries no legal or licensing implication.

- The homepage identifies the operator as ООО СК «Сбербанк страхование жизни».
- The homepage presents regulatory-licence information attributed to the Bank of Russia alongside financial disclosures and insurance documentation.
- The homepage advertises online policy issuance and claims-related services, including a stated five-minute payout capability and more than ₸850 billion paid to clients during a year.
- The corporate product page contains no sensitive embedded form, hidden form, externally directed password form, or detected cryptocurrency functionality.

What to Verify Next

For enhanced due diligence, the legal name and licence details should be matched against the Bank of Russia’s official registry. Applicable policy wording, exclusions, surrender terms, fees, and investment-risk provisions should be reviewed before purchasing savings or investment-linked coverage. Official support and payment instructions should also be confirmed through independently obtained corporate channels before material transactions.

- The product catalogue distinguishes conventional protection products from capital accumulation and investment-linked offerings, requiring product-specific suitability review.
- The site provides policy documentation and financial disclosures that can support contractual and counterparty due diligence.
- Published telephone support and a physical Moscow address provide independent channels for confirming customer-service and payment procedures.

Summary Verdict

The website is a legitimate, established, and trustworthy corporate insurance portal. Its institutional identity, sustained operating history, clean external reputation, meaningful traffic footprint, and mature customer-facing content converge strongly, with no contradictory risk signals. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves directly to Russian hosting operated by AS-SERVICEPIPE / SERVICEPIPE LLC, without a detected CDN or WAF layer. Its identifiable hosting path and valid transport encryption provide sound baseline integrity, although infrastructure controls alone are not evidence of business legitimacy.

- The hosting infrastructure serves the site from AS201706 (AS-SERVICEPIPE — SERVICEPIPE LLC, RU), with one resolved likely-origin address in Russia.
- No CDN vendor or edge address was detected; the hosting origin is directly observable.
- The site uses a domain-validated TLS certificate issued by YE2, valid until 23 September 2026.

Closing Assessment

Prospective customers may use the site normally, while applying standard financial-services due diligence and reviewing contractual terms before entering material or long-duration commitments.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about sberbank-insurance.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
