

Is sblglobaltech.com legit? TrustSniffer's high-trust assessment: 75/100

sblglobaltech.com

Verdict

75

OUT OF 100

HIGH TRUST

sblglobaltech.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Simple ecommerce landing/coming-soon page (sblglobaltech.com) with product placeholder copy, newsletter signup, contact hours, and cookie banner. No login, payment flows, or strong identity/verification signals present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	None flagged it VirusTotal	CLEAR
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	26% confidence AbuseIPDB, 13 reports; shared hosting inflates reports	CLEAR
Domain age	4 months old Most scam domains are under a year old	RISK

The page as captured

<https://sblglobaltech.com/>

What sblglobaltech.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2016.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

sblglobaltech.com is a “Launching Soon” retail storefront that presents planned featured products, an email newsletter offering 10% off a first purchase, basic contact hours, and standard privacy, terms, and cookie notices. Its apparent business model is future online product sales supported by newsletter-driven promotions rather than an operational payment or account platform.

Scam/Impersonation Risk

No blacklist, phishing, malware, or brand-impersonation contradiction was observed. The homepage is a basic ecommerce landing page with placeholder-style copy such as “New products are coming soon!” and “Generate excitement,” but it contains no login form, payment flow, wallet functionality, or other high-risk interaction. A reputational signal exists at the shared hosting-IP level: abuse reports concern an Amazon content-delivery IP rather than the website’s domain or page content, so the signal does not establish malicious activity by this site. The available evidence therefore supports an apparently legitimate, low-risk presentation while leaving the real-world operator identity independently unverified. Evidence:

- The homepage is labelled “Launching Soon,” contains featured-product placeholders, and has no detected login or payment form.
- The homepage’s only form is a newsletter signup, with no sensitive fields or untrusted submission destination detected.
- The site’s historical records show 22 archive snapshots spanning 2016–2026, with no detected category repurposing or semantic drift.
- The current registration record states: Registered 2026-04-14 (~0.35 years old), through GoDaddy.com, LLC.

Regulatory Verification Notes

The site presents privacy and terms pages, but the available storefront content does not identify a specific legal operating entity, licensing authority, or registration number. For a planned general retail business, this is a disclosure gap requiring ordinary merchant-identity and consumer-protection checks before commercial launch; it is not, on its own, evidence of a scam. The external broker-context check produced no matching record, but that signal is contextual and does not verify licensing or legal status. Evidence:

- The homepage provides generic “About Us” placeholder text rather than a substantive corporate profile.
- The terms and privacy links are present, but the supplied page content does not show a named legal entity or license details.
- The site is hosted on AS16509 (AMAZON-02 - Amazon.com, Inc., US).
- The transport certificate is issued by GoDaddy TLS Intermediate CA DV - R1v1, uses DV validation, and is valid to 2027-02-26.

What to Verify Next

Before the storefront begins accepting orders, the prospective counterparty should confirm the legal entity named in its final terms and invoices, check any applicable business registration or consumer-trading requirements with the relevant registry, and review the published returns, delivery, refund, and payment-protection arrangements. Contact channels should be confirmed independently through an offline or otherwise trusted route, and any future checkout should be assessed for clear merchant identification and secure payment handling. Evidence:

- The homepage currently describes a future product launch rather than an active catalogue or completed checkout.
- The contact section supplies business hours and an invitation to visit, providing a basis for independent contact confirmation.
- No sensitive payment or account workflow was present in the supplied page capture.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. The classification is appropriately qualified because the site’s real-world operator has not been independently connected to a verified legal identity.

Infrastructure Integrity

The website is protected by a CDN/WAF arrangement using Amazon edge infrastructure; observed addresses were 13.248.243.5 and 76.223.105.230 on AS16509, and no origin candidate was observable. This reduces direct origin exposure and is a mitigating technical control, but it is not proof of business legitimacy.

Closing Assessment

Normal browsing and newsletter interaction appear proportionate at this stage, while credential or payment activity should await the ordinary independent merchant, returns, and payment-protection checks appropriate for a newly presented storefront.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 13 reports on hosting IP 76.223.105.230 (Amazon.com, Inc., Content Delivery Network), 26% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of sblglobaltech.com.

- The request stayed on sblglobaltech.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2028-04-14. CLEAR
- The earliest public archive of this site is from 2016-08-08. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about sblglobaltech.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
