Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the Russian-language corporate presence of ООО «Сбербанк Капитал», presenting an established investment and project-management business active in residential and commercial real estate, pharmaceuticals, and the energy sector, with company information, project updates, corporate news, and facilities for business inquiries.

Scam/Impersonation Risk

No identity contradictions, impersonation indicators, phishing behavior, or malicious reputation findings were observed. The site's corporate identity aligns with its content and long-running digital history, while the absence of deceptive financial promotions, credential-harvesting forms, cloaking, and suspicious scripts supports its legitimacy. The website appears designed to communicate corporate capabilities and projects rather than solicit public deposits or promise investment returns.

- The homepage identifies the business as ООО «Сбербанк Капитал» and describes more than ten years of project activity.
- The domain was registered in 2008 and is approximately 17.73 years old.
- The web archive contains 218 snapshots from 2009-10-23 through 2026-05-10, spanning 18 tracked years without evidence of suspicious repurposing.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no phishing finding, and no reported abuse; the domain also holds a global traffic rank of 60,920.

Regulatory Verification Notes

The website provides a named legal entity, a Moscow address, telephone contact details, corporate-governance content, and privacy and personal-data information. No regulatory licence or licence number is asserted on the reviewed page, but the stated model is corporate investment and project management rather than a public-facing regulated investment offer; the available evidence therefore does not establish that a licence disclosure is expected for the activities presented. No matching third-party broker profile was identified, which neither confirms nor challenges the entity's legal status.

- The homepage presents corporate-governance information and identifies activities in real estate, pharmaceuticals, and the fuel-and-energy industry.
- The contact and privacy content supplies a physical Moscow address, telephone number, personal-data information, and a business-inquiry form.

- The homepage does not advertise public investment returns or claim a financial-services licence.
- The site uses a DV TLS certificate issued by YE2, valid until 2026-09-28; the domain registration is maintained through RU-CENTER-RU and expires on 2026-11-11.

What to Verify Next

For regulated onboarding or material contractual engagement, the legal entity’s current registration particulars, authorized representatives, and contracting authority should be confirmed through the applicable official corporate registry. The intended service should also be mapped to relevant regulatory requirements, and official contact channels should be confirmed through an independent corporate source before executing agreements or transferring material funds.

- The site’s stated purpose is corporate project activity and business inquiry rather than retail account opening.
- The published legal identity and physical contact information provide concrete reference points for corporate-registry and counterparty checks.
- The contact form has no untrusted submission destination, and observed external requests and posts were confined to recognized destinations.

Summary Verdict

The website is a legitimate, established, and trustworthy corporate presence. Its coherent legal identity, mature provenance, substantive project content, clean external reputation, and benign observed behavior converge strongly, with no contradictory risk signals. Normal interaction, including standard site use and any ordinary account login made available through the service, is appropriate.

Infrastructure Integrity

The site resolves directly to a likely origin address without a CDN or WAF layer. It is served from AS201706 by AS-SERVICEPIPE / SERVICEPIPE LLC in Russia; this is a conventional, identifiable hosting posture, although direct origin exposure provides less network-layer shielding than an edge-protected deployment.

- The hosting infrastructure resolves to one likely origin IP, 155.212.234.20, in Russia, with no edge IP detected.
- The site is served from AS201706 (AS-SERVICEPIPE — SERVICEPIPE LLC, RU).

Closing Assessment

Standard engagement is appropriate; regulated or material transactions should proceed through the institution’s ordinary counterparty due-diligence and authorization controls.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about sbrf-capital.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
